Use

This is a premium wiping cloth ideal for cleaning, polishing, dusting, staining and general purpose cleanup. This cloth is low in lint and highly absorbent because it has been washed and bleached, as well as sanitized. It also has been scanned for foreign metal objects.

This wiping cloth is suitable for use with chemicals such as MEK, Acetone and lacquer thinner, paint thinner, etc.

Manufacturer's Size Specificatons

- Each wiper shall contain a minimum of 144 inches and a maximum of 576 square inches
- No wiper shall be smaller than 12" across at its narrowest point. Unless specified as a 6X9 wiper
- No wiper shall be larger than 26" across at its widest point
- A square cut will vary from approximately 12" x 12" up to approximately 24" x 24" with an average size being approximately 18" x 18" square
- All tubes must be open
- Blended textures: Approx. 75% minimum smooth, 25% baby ribbed and/or pique textures
- If goods need to be fluffed they must be fluffed in the fluffer and not on the production line

Manufacturer's Production Specifications

- New virgin material – wiping cloths shall be cotton and/or cotton synthetic made from clean mill ends and mill remnants
- Shall be soft, absorbent and of knit construction
- Minimum of 4 ounces per square yard
- Wiping cloths cut 18" x 18" with 2" variance of 100% cotton, but no less than 80/20 cotton poly blend
- Must be washed by manufacturer after receiving from mills
- Cut before laundering
- Washed at 180 degrees F to sanitize and remove all sizing
- Scanned for foreign metal objects
- Must absorb liquids within 1 second
- Must be washed, bleached, rinsed and a surfactant added for absorbency
- Must be packed immediately after drying to keep lint from accumulating
- Heavily napped fabric, mesh fabrics constructed from heavy twisted yarns, and starched or stiffened fabrics are not acceptable
- Goods must be at least 50% bright white, remainder may be milky shades of white
