

## “Staggered Length Kits”

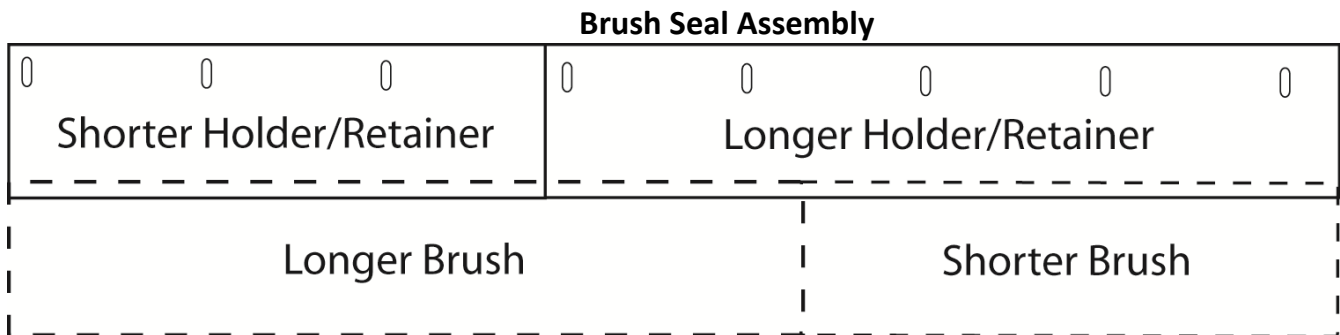

Important: 8', 10', 12' and 14' long brush seals are shipped in "Staggered Length Kits" for ease of shipping and reduced shipping costs. When assembled, these kits allow for an effective, “good-looking” and virtually “gap-free” seal.

### “Staggered” Lengths-

- 8'- Brush and holder are provided in 5' and 3' lengths.
- 10'- Brush and holder are provided in 6' and 4' lengths.
- 12'- Brush and holder are provided in 7' and 5' lengths.
- 14'- Brush and holder are provided in 7'10 and 6'2" lengths.

### Kit Assembly:

Combine the short and long pieces of holders and brush together to form a single continuous length.

*Solid Line-* Brush Holder/Retainer

*Dashed Line-* Brush

### 10' Example

1. The 6' brush is inserted into the 4' holder. The 6' holder is then added.
2. The remaining 4' brush is then slid into the above assembly.

This combination produces a 10' weatherseal that is easy to install and provides a high-quality, continuous and gap-free weatherseal.
