

Keep Your Building Clean & Green

Save time and money by cleaning less, while also creating a GREEN environment by using less chemicals, water, and energy. An effective 3-mat system combines a scraper, scraper/wiper, and wiper mat to prevent dirt particles and water from entering the building. This not only protects a building's flooring from costly damage, but also protects its occupants from falls caused by dirty, wet, and slippery floors. The system starts with a scraper mat placed outside the building entrance, followed by a scraper/wiper just inside, and ending with a wiper positioned inside to collect any remaining water and dirt.

The mats themselves are GREEN, too. Several contain post-consumer PET content, which prevents up to 96 bottles per mat from entering landfills and preserves natural resources. The result: a clean and safe workplace that also helps protect our environment.

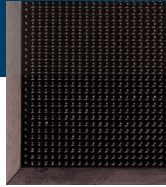

- ▶ Keeps flooring clean and safe
- ▶ Stops soil and water from entering building
- ▶ Protects floors from damaging debris
- ▶ Excellent wiping and absorbing power
- ▶ Designed for medium to heavy traffic
- ▶ Slip-resistant vinyl backing holds mats in place to prevent falls
- ▶ Mat surfaces contain up to 100% recycled PET content
- ▶ Available in gray or black
- ▶ Vinyl loop Scraper/Wiper is made using quality 3M® materials
