

We've got your back.

Comprehensive, cohesive signaling solutions...

Input/Output Panels

Gain Ample signaling system capacity with up to 1,000 points for integrated fire alarm, emergency notification, smoke control, common relay monitoring, and auxiliary functions.

Remote Audio Activation

Select up to five Remote Microphone locations for manual system override.

Audio Notification

Choose any method of activating up to eight field-recordable messages or tones via automatic or manual activation with manual page override.

Remote Annunciation

Keep your entire system within sight with simple text-based station-level annunciation.

System Speakers

Indoor and outdoor rated wall and ceiling speakers provide a high degree of intelligibility in exchange for low operating costs, as well as innovative value-added design features.

Beacons

Choose from models with field configurable flash rates and light intensity, weatherproof or explosionproof survivability, or LED and the latest solar technology.

Stacklights

Interlocking stacklights instantly convey critical information through color, flash rate, and integrated sounders. Advanced LED technology adds a new dimension of reliability.

Special Applications

Weatherproof and shock-resistant signals withstand the kind of punishment meted out by tough facilities, while signals for foodservice applications are easy to clean.

Projection Horns

Nothing catches attention in noisy workplaces like high performance horns – ideal for emergency signaling or shift change notification.

High Power Speakers

Our remarkably lightweight High Power Speaker Arrays reach miles in every direction to provide effective and intelligible notification for campuses and outdoor facilities.
