

PLASTIC STRAPPING SOLUTIONS

Material Handling, Packaging and Shipping Strapping and Strapping Equipment, Plastic Strapping

STRAPPING SOLUTIONS

In the appropriate applications, plastic strapping has consistently proven to reduce the amount of packaging at the source over alternative packaging methods. Source reduction means using less material to hold or package a product. This means less packaging to discard at the destination and less material to recycle. In addition, when you can apply plastic strapping with a machine or friction weld tool you further reduce the packaging by eliminating a mechanical seal. plastic is also light and flexible, making it the safest alternative for many applications.

PLASTIC STRAPPING SOLUTIONS

Material Handling, Packaging and Shipping Strapping and Strapping Equipment, Plastic Strapping

STOCK STEEL STRAPPING

Steel strapping is consistent in width, gauge, and finish. Published break strengths are average and meet or exceed industry standards.

Regular Duty Steel Strapping

Regular duty steel strapping is manufactured from cold rolled steel. All regular duty steel can be used in manual and pneumatic tools, as well as automatic steel strapping heads.

High Tensile Steel Strapping

High tensile steel strapping is manufactured from cold rolled steel and heat treated to maximize break strength and ductility. High tensile steel provides additional break strength and shock resistance for your toughest applications.

BUCKLES

Designed for light duty applications where corrosion resistance and/or non-scratch product is important, offering a range of plastic buckles to fit your demanding applications. For superior holding power and convenience, the patented "Bucklelok" design "locks" each leg into position to allow for pre-threading.

16P029

16P025	1/2" x 17' Plastic Strapping, Plastic Buckle, BK., 17ft., 25/pkg.	✓	✓	Medium
--------	---	---	---	--------

2CXR1

Phosphate Heavy Duty Buckles- for use with polyester cord and rayon cord heavy duty applications. The phosphate coating affords some additional protection against corrosion, and also significantly improves joint efficiency when properly applied.

2CXR1	3/4" Strapping Buckle, 1000/pkg.	4	4	High
2CXR2	1-1/4" Strapping Buckle, 1000/pkg.	4	4	High

EDGE PROTECTORS

For use with both steel and plastic strapping, corners cushion your product and allow the strap to be tightened to its maximum tension without damaging the package. Each plastic corner is constructed from a specially formulated resin and is ribbed to hold the strapping firmly in place. Steel corners meet all Federal and GSA specifications.

2CXP7	1-3/8"W, 1"L, Plastic, 2000/pkg., Max. 3/4" Strap, WT	✓	✓	High

STRAPPING KITS

The strapping kits offers wholesalers of both plastic and steel strapping an excellent opportunity to increase sales and profits by efficiently servicing those markets that need a complete strapping set up. With the family of kits, there is no need to inventory separate components, do any packaging, or send a sales rep out to do a demo.

These kits are available in both steel and plastic, and come in several sizes and varieties for a wide range of applications.

2CXL5

Grainger Item Number	Item Description	Environmentally Responsible	Safety Enhanced	Productivity Levels
Replacement Kit- Kits for first time user and multi-location buyers that include everything in one kit.				
16P047	7200ft. 1/2", 500lb., strap, 500 Seals	4	4	High
