

Intermatic has provided energy conscious solutions for residential, commercial and industrial customers for over 115 years. We believe saving energy is the right thing to do... **ALWAYS!**

Out of our wide range of products, we've chosen the top 5 smartest energy savings solutions. These solutions offer quick payback by saving energy, installation time and maintenance. Contact an Intermatic sales representative or visit www.intermatic.com for more information on *Energy Savings*.

Intermatic has a wide variety of Title 24 Compliant products

Does your utility company offer energy incentives? Check out <http://www.dsireusa.org> to see whether you qualify for rebates using these products.

Countdown to Savings

Replace existing wall switches with countdown timers that limit the ON time of lighting, fans and AC loads.

- Less expensive and more cost effective than occupancy sensors
- Quick payback on your initial purchase

Available in 3 colors and many time increments, including a to-the-minute programmable countdown timer (EI400)

4XGV5 / EI400

Heat up the Savings

Save hours of heating time by turning water heaters OFF during low usage hours, and ON when hot water usage resumes.

- For single and three phase electric water heaters
- May be eligible for utility company rebates in certain areas

Electronic models, voltages and contact ratings are available at www.intermatic.com
