

1 1/4" WALL MOUNT P-TRAP

1PNK9

Used in combination with metal or plastic drain systems.

A pipe wrench may be required to install this product and to remove old drain parts.

To remove old drain trap:

1. Loosen upper **B** and lower **F** nuts on trap bend **D**.
2. Remove old trap **D** bend being careful not to spill waste.
3. Loosen wall nut **I** and remove wall tube **G**. Save nut **I** and washer **J**.

To install new drain trap:

1. Slide upper nut **G** (threads down) and washer **C** up tailpiece **A**.
2. Attach longer portion of trap **D** bend to tailpiece **A**. Do not tighten.
3. Place washer **E** on end of wall tube **G**. Slide nut **F** (threads down) onto wall tube. This will connect to trap bend.
4. Slide escutcheon **H**, nut **I** and washer **J** that you saved onto wall tube **G**. (Threads on nut should be facing out.) This will connect to waste pipe **K**.
5. Insert wall tube **G** into waste pipe **K**. Align trap bend **D** and wall tube **G**. Tighten all connections. Turn on water and check for leaks. If leak occurs, tighten nuts slightly.
