

1 1/4" WALL MOUNT P-TRAP

Used in combination with metal or plastic drain systems.
Won't deteriorate and is unaffected by strong drain cleaning chemicals.

Tools are not required to install this product. A pipe wrench may be needed to remove old drain parts.

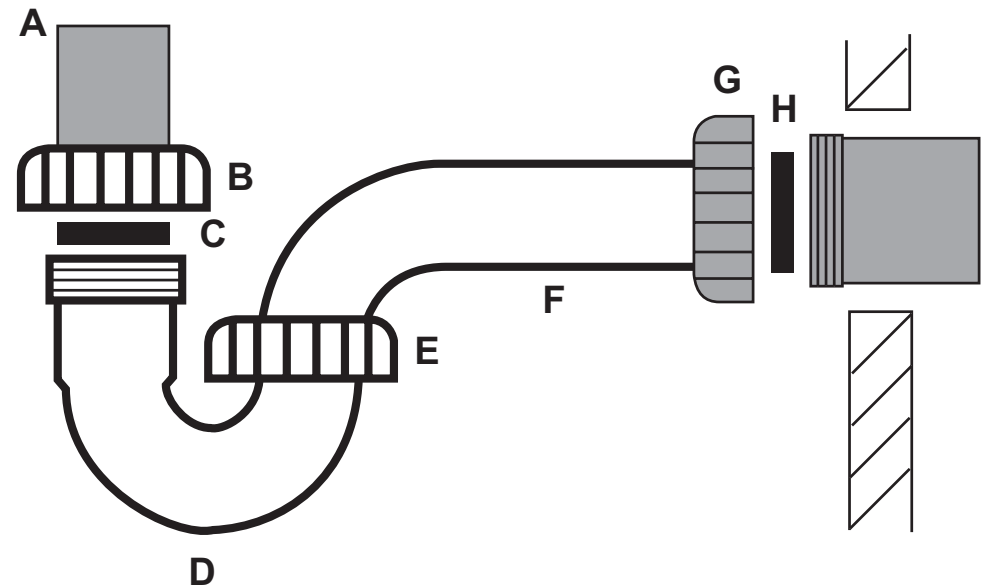

To remove old drain trap:

1. Loosen upper **B** and lower **E** nuts on trap bend **D**.
2. Remove old trap bend being careful not to spill waste.
3. Loosen wall nut **G** and remove wall tube **F**. Save nut **G** and washer **H**.

To install new plastic trap:

1. Slide upper nut **B** (threads down) and slip washer **C** up tailpiece **A**.
2. Attach longer portion of trap bend **D** to tailpiece **A**. Do not tighten.
3. Slide nut **G** (threads down) onto wall tube **F**. This will connect to trap bend **D**. Slide the saved nut **G** (threads out) and washer **H** on wall tube **F** and insert into waste pipe **I**. Tighten nut slightly.
4. Align wall tube and trap bend and hand tighten all connections. Avoid overtightening. Turn on water and check for leaks. If leaks occur, tighten nuts slightly.

A-tailpiece*
B-slip nut
C-washer
D-trap bend
E-slip nut
F-wall tube
G-slip nut*
H-washer*
I-threaded waste pipe*
