An easy and flexible way to do gas detection.

iBRiD™ MX6

Get ready to see hazardous levels of oxygen, toxic and combustible gas, and volatile organic compounds (VOCs) like never before.

The MX6 iBrid™ is more than an intelligent hybrid of Industrial Scientific’s best monitoring technologies. It’s the first gas monitor to feature a full-color LCD display screen.

The display improves safety with clear readings in low-light, bright-light or anywhere in between. Whether the work is outside, inside or underground, it’s easy to see what gas hazards lurk in the immediate work environment.

And a color display is more than eye-catching. It allows the user to step through instrument settings and functions with an intuitive menu and the instrument’s five-way navigation button. It even supports the option of on-board graphing for easily interpreted direct readings and recorded data.

Plus, the MX6 iBrid is our most rugged instrument ever. It is compatible with our DSX™ Docking Station and iNet.

Don’t Buy Gas Detectors

Subscribe to Gas Detection as a Service

It gives you help from The Gas Detection People.

Let us handle your gas detection program. Gas d etection is probably not core to what you do. But, it’s all that we do. It’s what we love to do.

It gives you a safer workplace.

On average, gas detectors go into high alarm once every ten days. How many high alarms did your facility have? iNet gives you information and tools to fix problems before they happen.

It gives you cost savings.

The list price is only part of a gas detector’s total cost. You have to maintain it. You have to wait for it to be serviced. iNet eliminates unnecessary ownership and maintenance costs.

iNet Compatible for Increased Safety, Cost Savings and Productivity

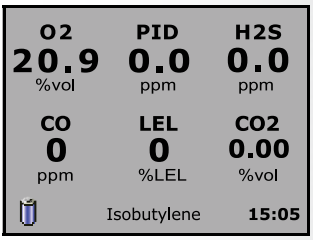
iNet is a software-based service that manages your fleet of gas detectors. iNet solves the most common gas detection problems. For example, iNet keeps people safe by providing visibility into alarms, exposure and usage. It keeps gas detectors working without costly and time-consuming maintenance. And with iNet, you won’t have to buy the MX6. So why do it?

How Does iNet Work?

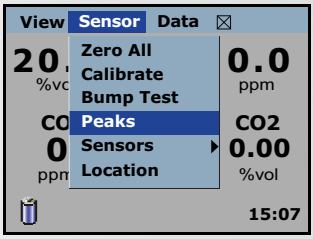
1. Operators dock gas detectors owned by Industrial Scientific.
2. Docking Stations perform bump tests, calibrations and record-keeping.
3. iNet Control provides visibility into your gas detection program via the Web.
4. iNet e-mails real-time alerts and status reports.
5. When iNet detects a problem, Industrial Scientific rushes a replacement gas detector to you.

THE MX6 iBRID COLOR DISPLAY

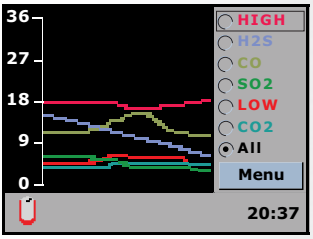
Enhanced Visibility – Expanded Functionality



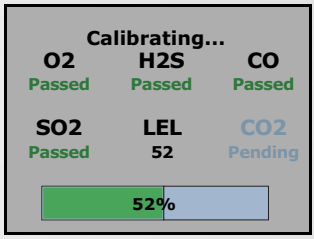
The MX6 clearly shows real-time readings in PPM or % by volume.



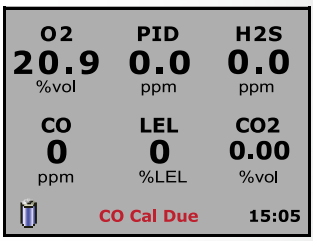
An intuitive menu provides easy access to features and setup.



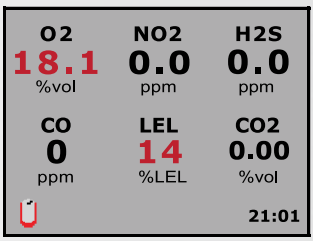
Datalog trends and direct readings can be viewed graphically.



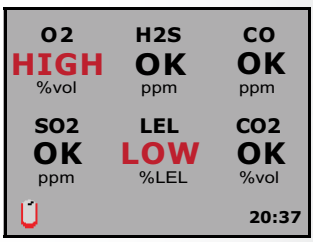
Calibration progress and results are shown for each sensor.



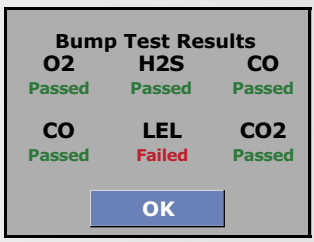
A “calibration due” warning appears for each relevant sensor.



Bright red numerals and a flashing backlight show alarm conditions.



Alarms shown with “Go/No Go” text and flashing backlight.



Color-coded text shows test or calibration results at a glance.
