

Productive Workplace Dry Film Graphite Lubricants

Issue:

Friction, corrosion, and wear are common issues in industrial environments. These issues can lead to equipment failure, downtime, and increased maintenance costs. SLIP Plate products provide a long-lasting, protective coating that addresses these issues.

Application:

SLIP Plate products are applied to metal surfaces to provide a dry film graphite coating. This coating significantly reduces wear, extends part life, and inhibits the buildup of dirt and grime. Unlike oil and grease, graphite performs well in extreme temperatures after application. Hot or cold, SLIP Plate products provide high-quality lubrication in every season.

Recommendation:

Grainger offers a wide range of SLIP Plate products which provide excellent coating & lubrication solutions where traditional oil or grease products may fall short. SLIP Plate products come in a wide variety of formulas that can be brushed, rolled, or sprayed on - bonding to clean metal, wood, concrete, and most plastics. Wherever friction is a concern, there is a SLIP Plate product that will get the job done.

For more information about SLIP Plate® products from Asbury Carbons, contact your Grainger representative or local branch. You may also go online to grainger.com to place your order and view other Asbury Carbons lubricant solutions.

Product Features and Benefits

- Hydrophobic graphite repels water, rain, sleet, and snow to inhibit rust and corrosion.
- Significantly reduces noise from rubbing or grinding caused by lack of lubrication.
- Unlike oil or grease lubricants, coatings dry completely and prevent the buildup of dirt and grime.
- Reduces part wear, leading to extended service life and reduced maintenance costs.
- Quick dry and heavy duty products available to meet a wide range of lubrication needs.

SLIP Plate®

Productive Workplace Dry Film Graphite Lubricants

SLIP Plate® Original Aerosol: Easy to use, dry-film graphite lubricant that produces a slick coating that reduces friction, prevents the buildup of dirt and grime, and inhibits rust and corrosion.

Recommended Application Method

Aerosol Spray

Available Packaging

6- 12 oz Cans

Product Code

33203G

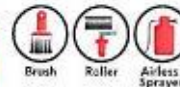

Grainger Stock Number

1VVK7

SLIP Plate® No. 1: The Original heavy-duty dry-film graphite lubricant with the highest concentration of friction fighting graphite on the market today. Solves sliding friction problems in equipment, and heavy-wear surfaces.

Recommended Application Method

Available Packaging

4 - 1 Gallon Cans

Product Code

330150S

Grainger Stock Number

1WVL3

Available Packaging

5 Gallon Pail

Product Code

33008

Grainger Stock Number

1WVL4

SLIP Plate® No. 3: The same unique dry-film technology as SLIP Plate No. 1, but made with finer graphite in a quick-dry formula for less down-time and easier application with conventional spray guns.

Recommended Application Method

Available Packaging

4 - 1 Gallon Cans

Product Code

33215

Grainger Stock Number

1WVL5

SLIP Plate® products offer a wide variety of solutions for roll-up doors found at loading docks, in home garages, and on commercial vehicles. Dry-film graphite lubricants can last longer than traditional wet lubricants like oil and grease, prevent the buildup of dirt and grime, and save you money by extending part life and reducing the time required to maintain your equipment.
