

# BEAT THE (((BEEP)))

## Is it Time to Replace Your CO Alarms?

Carbon monoxide (CO) alarms in Washington may be about to expire. In Washington state, CO alarms have been required in NEW residences since January 1, 2011 and in EXISTING dwellings since January 1, 2013. Many of the units installed at that time have already or will soon reach the end of their useful life, and will begin beeping every 30 seconds.

*NOTE: Once an alarm sounds its end-of-life warning, it will not detect CO – leaving families unprotected.*

### It's the law in Washington:

**Effective January 1, 2011:**  
Newly constructed single and multi-family homes.

**Effective July 1, 2013:**  
Existing single and multi-family homes.

Most single and multifamily homes are required to install CO alarms outside of each separate sleeping area in the immediate vicinity, and on every level of the dwelling (including basements).

### Beat the Beep. Stay Protected with Kidde's UL-Listed CO alarms:

All Kidde CO alarms now last ten years! (units manufactured after Jan 10, 2013)

C3010:  
Ten-year  
Battery
