

ABOUT JOHNSON LINE LASERS:

Johnson Line Lasers are the solution when you want to mark a level plane across a wall. Our straight line lasers project horizontal and vertical laser lines at 90° to each other. With self-leveling laser technology, all Johnson line lasers will automatically project a level laser beam, even when situated on uneven ground. If the line laser has tilted beyond the point where self-leveling can occur, visual and audible alarms will sound. With the use of a laser detector, Johnson line lasers can even be used outside.

LINE LASER APPLICATIONS:

Drop ceilings, drywall installation, sprinkler installation, HVAC, ceiling joist & rafter alignment, wallpaper & stenciling/painting, tiling (walls and floors), electrical outlets & switches, install conduit & wiring, track lighting, curtain walls/shower doors, windows, cabinet & countertop alignment, soffits, chair rail/trim, closet shevels/doors, paneling/wainscoting, site preparation, establishing grades, excavating, landscaping - terracing & retaining walls, rough & fine grading, digging basements, setting foundation & footers, retention ponds & septic tanks, controlling concrete pours, alignment & plumb of concrete forms, leveling deck floors, establish diagonals & footings for decks/patios, contour framing, drainage.

QUAD-LINE[®] SELF-LEVELING CROSS-LINE LASER WITH PLUMB BEAM

FEATURES:

- Locking mechanism protects inner pendulum during transportation
- Manual mode allows unit to tilt to extreme angles
- Laser can be rotated 360°
- Projects three vertical lines, two horizontal lines and one plumb-down beam simultaneously or individually
- Self-leveling with visual and audible alarms when beyond leveling range
- Laser beam can be set to pulse for use with optional detector (not included)

3RXD3 INCLUDES:

Laser, NiMH rechargeable battery pack, 6.4V battery adapter, 4 "AA" alkaline battery compartment, tinted glasses, magnetic target, instruction manual with warranty card and a hard-shell carrying case

SELF-LEVELING CROSS LINE LASER WITH 3 VERTICAL LINES

FEATURES:

- Locking mechanism protects inner pendulum during transportation
- Manual mode allows unit to tilt to extreme angles
- Laser can be rotated 360°
- Projects three vertical lines and one horizontal line simultaneously or individually
- Self-leveling with visual and audible alarms when beyond leveling range
- Laser beam can be set to pulse for use with optional line detector

3RXD7 INCLUDES:

Laser, 3 "AA" alkaline batteries, tinted glasses, magnetic target, instruction manual with warranty card and a soft-shell carrying case

25K793 INCLUDES:

Laser, line generator laser detector with clamp, 3 "AA" alkaline batteries, tinted glasses, magnetic target, instruction manual with warranty card and a soft-shell carrying case

SELF-LEVELING 360° LINE LASER

FEATURES:

- Self-Leveling 360° continuous horizontal laser line
- Visual and audible alarms when beyond leveling range
- Locking mechanism protects pendulum during transportation
- Manual mode allows unit to tilt to extreme angles
- Laser can be set to pulse for use with optional line detector (not included)

23J470 INCLUDES:

Laser, 4 "AA" alkaline batteries, wall mount bracket, mounting strap, instruction manual with warranty card and a soft-sided case

23J477 INCLUDES:

Laser, 4 "AA" alkaline batteries, detector with 9V battery and clamp, wall mount bracket, mounting strap, instruction manual with warranty card and a soft-sided case

SELF-LEVELING ULTRA-BRIGHT CROSS-LINE LASER

FEATURES:

- High-powered bright red cross beam laser
- Manual mode allows unit to tilt at extreme angles
- Locking mechanism protects inner pendulum during transportation
- Self-leveling with visual and audible alarms when beyond self-leveling range
- Multi-functional magnetic base with rare earth magnets for use on walls, metallic surfaces or tripod

TYR8 INCLUDES:

Laser, multi-functional magnetic base, 3 "AA" alkaline batteries, mounting strap, magnetic target, instruction manual with warranty card and a soft-sided pouch

SELF-LEVELING ULTRA-BRIGHT CROSS-LINE LASER

FEATURES:

- High-powered bright red cross beam laser
- Manual mode allows unit to tilt at extreme angles
- Locking mechanism protects inner pendulum during transportation
- Self-leveling with visual and audible alarms when beyond self-leveling range
- Multi-functional magnetic base with rare earth magnets for use on walls, metallic surfaces or tripod

3RXD8 INCLUDES:

Laser, 2 "AA" alkaline batteries, floor target, instruction manual with warranty card and a soft-sided pouch
