

ARMOR METAL RESCUE BATH

RUST REMOVER LIQUID

SAFE ON EVERYTHING EXCEPT RUST

Whether your company manufactures metal parts or receives them from a supplier, with Metal Rescue Rust Remover BATH on-the-job, you can eliminate rust-removal outsourcing, metal reworking or scrapping rusted or corroded metal entirely.

Rust removal with water-based Metal Rescue BATH is clean, safe and easy -- there are no harsh chemicals, no acids, no scrubbing, dipping, or sand blasting. Instead, Metal Rescue removes rust through the "magic" of chelation technology. During bath or soak of metal parts, Metal Rescue surrounds the rust (iron oxide) and pulls it from the metal's surface. This is no hocus pocus — Metal Rescue BATH is environmentally friendly, biodegradable, non-flammable and fume free.

Metal Rescue BATH works in three steps — just soak, check, rinse/dry — and it does not harm other materials such as rubber, elastomers, plastic, vinyl, clothing and skin.

For iron and steel parts that cannot be soaked, Metal Rescue Rust Remover GEL is recommended.

METAL RESCUE BATH BENEFITS

- **SAFE ON YOU:** no acids, fume free
- **SAFE ON METAL:** safe on most etched, embossed, painted or machined metal surfaces
- **CLEAN:** water-based, environmentally-friendly, biodegradable
- **EASY-TO-USE:** soak part, check and remove/rinse
- **UNCOMPLICATED DISPOSAL:** as supplied can be disposed in city sewer, if hazardous material is introduced during rust removal then local/federal disposal requirements apply
- **REUSABLE:** can be reused until performance drops off
- **SEVERAL OPTIONS:** available in quantities of 1, 5, 55 and 330 gallons

ARMOR METAL RESCUE GEL

RUST REMOVER GEL

ON-THE-SPOT RUST REMOVAL

Metal Rescue® Rust Remover GEL is designed to remove rust from iron and steel using a unique formula that is environmentally friendly and does not contain any harmful or corrosive acids, alkalis, or solvents. It is clean, easy-to-use and highly adhesive.

Metal Rescue GEL is called the on-the-spot rust remover because it is formulated to cling to metal. It is ideal for vertical surfaces, spot rust, or rust in hard-to-reach areas and it allows for controlled application—apply GEL only where needed to eliminate waste and save money.

Simple 3-step application — just apply, wrap and remove — and GEL does not compromise any mechanical properties or functionality and it can be used in conjunction with other ARMOR VCI products.

For iron and steel parts that can be soaked, Metal Rescue BATH is recommended.

- **SAFE:** rust removal free of scrubbing, dipping, sand blasting or phosphoric acids
- **EASY-TO-USE:** apply, wrap, remove
- **SAFE ON METAL:** safe on most etched, embossed, painted or machined metal surfaces
- **CLEAN:** environmentally-friendly, non-hazardous, biodegradable
- **ECONOMICAL:** eliminates cost of outside rust removal services
- **HIGHLY-ADHESIVE FORMULA:** easy application on vertical surfaces/spot rust
- **CONTROLLED APPLICATION:** use only where needed to eliminate waste and save money

All items on the Stock & Ready® product list are in-stock and ready-to-ship with no order minimums.

Stock & Ready® orders placed by 1 p.m. EST will ship by next business day.
