

FOR IMMEDIATE RELEASE

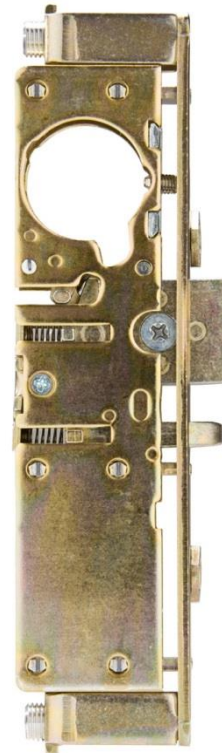

PRESS RELEASE

Rocky Mount, NC, (May 11, 2015) – Kaba Ilco Corp. is pleased to announce the introduction of the Ilco 452 Series Heavy Duty Deadlatch. The Deadlatch is a retrofit for the Ilco 451 Series Deadlatch and the 185 Series Deadbolts.

Features of this new deadlatch include the ability to change hands without disassembling the latchbolt or the springs. The faceplate can be used for either a left or right hand bevel by simply adjusting the bevel tabs on the front of the deadlatch.

In addition, depth adjusting tube spacers allow for a quick and precise installation without the use of mounting tabs.

The 452 Series is available as lock only, lock with one or two faceplates and/or with strikes.
