

LOAD CLAMP

Push tension handle all the way forward. Insert BAND-IT Center Punch clamp tail and push all the way into tool.

Tool Tip: To apply 3/8" wide clamps, use S03289 adapter kit. See attached instructions for 3/8" adapter.

TIGHTEN CLAMP

Tighten the clamp with short downward strokes. Tension handle should be in down position at completion of tightening clamp.

Note: Do not lift tension handle too high as it may open up buckle pusher, resulting in improper clamp application.

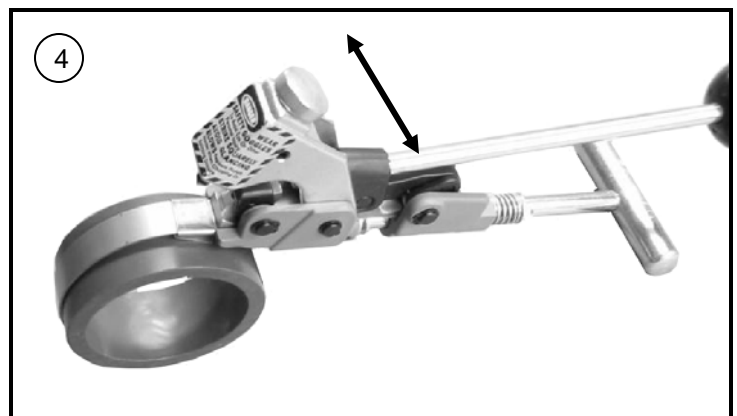

If clamp tension needs to be released before locking, move handle forward and move slide back against spring. This raises pulling dog and release clamp tension.

LOCK CLAMP

Holding tension handle down, lock clamp by hitting punch at least twice with 2 lb. Mallet.

Note: Only use genuine BAND-IT Center Punch clamps. Disregarding this may result in substandard clamps or tool failure. BAND-IT CP clamps are made out of Type 201 Stainless Steel or Galvanized Carbon Steel material with a stainless steel buckle for added strength.

REMOVE CLAMP TAIL

Hold hose and pivot the tool back and forth to break off clamp tail. Remove tail from tool by operating tension handle. When tail has moved through holding dog, raise tension handle and pull tail free.

INSTRUCTIONS: **DISSASSEMBLY AND ASSEMBLY OF PUNCH**

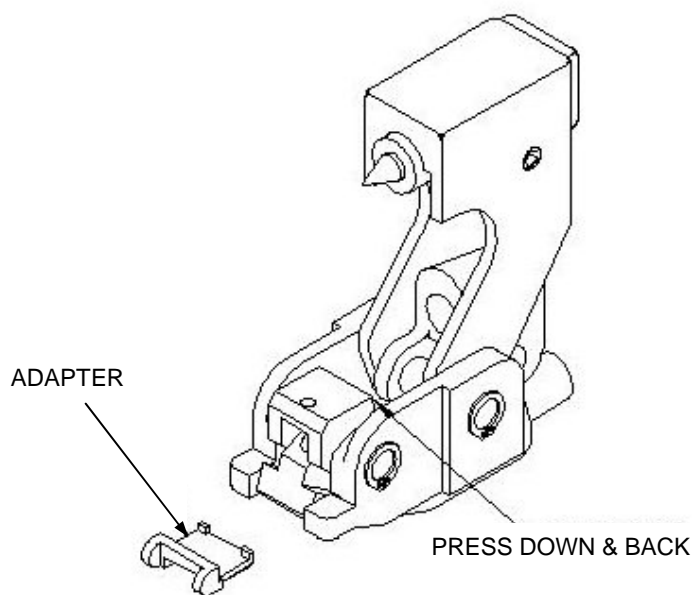

To replace the punch, remove the head spring pin. Rotate the punch holder until the retaining ball is visible on inside of head. Remove the retaining ball and pull the punch out. Replace punch and reassemble in reversed manner.
