

RATCHET INSTRUCTION:

1. Attach hooks to stable attachment points.
2. Insert free end of the webbing through the center slot of the ratchet reel (FIG 1) and pull to take up slack (FIG 2)
3. Move ratchet handle back and forth to tighten webbing, minimum of two wraps on ratchet reel (FIG 3)
4. Hooks and webbing should be in line with direction of pull.
5. Close Ratchet Handle to lock in place.
6. Squeeze spring release bar to open ratchet 180° for adjustments or webbing removal. (FIG 4)
7. Loads settle. Check tie-down and ratchet every 20-30 miles (32km/48km)-Adjust as necessary.

CAUTION READ BEFORE USE

1. DO NOT USE FOR LIFTING.
2. Area of attachment on vehicle or trailer must be sufficient strength to hold load.
3. Protect webbing from sharp edges and heat. Replace if webbing is cut, worn or damaged.
4. Warranty VOID if strap is cut or damaged.

CAUTION:

Your ratchet tie-down exerts great tension.
Do not overtighten to avoid damage to your load.

FEATURES:

- Adjusts from 1' to 15'
- For loads up to 400 lb. (182 kg)
- Maximum breaking strength is 1200 lb. (545kg.)
- vinyl coated steel hooks
- Quick release ratchet
- Tight locking ratchet mechanism
