Uvex HydroShield®

**Raising the Standard
in Anti-Fog Coatings**

You Can't Afford to Ignore Safety.

Don't Settle for Less than Uvex HydroShield®. 

Fogged lenses are one of workers' top complaints. And when they can't see, they can't work safely. Honeywell Uvex HydroShield Anti-Fog technology keeps them consistently fog-free **90X longer** than the majority of other anti-fog products, and requires no application and no maintenance. And they provide 2X greater scratch resistance* than our next best anti-fog coating. Which means no downtime on the job.

Ordering information

Uvex HydroShield Anti-Fog coating is now available on more than 115 SKUs of safety eyewear, sealed eyewear and goggles to keep them fog-free longer than ever before. The dual action Uvex HydroShield Anti-Fog lens coating provides **90X longer-lasting** fog-free performance* than the majority of other anti-fog products - even after extended wear and repeated cleanings. And it provides 2X greater scratch resistance** than our next best anti-fog coating.

*Uvex HydroShield performance is based on independent lab tests when compared to median test results of other Uvex anti-fog coated products under the EN166 and EN 168 testing standards.

**Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application.

All Uvex lenses offer 99.9% ultra-violet protection.

Anti-fog that works as hard as they do.

Hydrophilic and Hydrophobic.

Uvex HydroShield works by first absorbing moisture and then repelling it. When water droplets form, they are repelled to the sides of the lens.

The Uvex HydroShield coating is baked into the lens and remains effective even after repeated washes, requiring no application or maintenance.
