Tapping Block / Pro Pull Bar

Used to install all brands of pre-glued tongue and groove flooring, these tools are essential for installing laminate flooring. The Tapping Block base is 20" long by 2.75" wide by .75" high for maximum impact distribution to eliminate damage to the grooves of the flooring. The Pull Bar is a must for getting in between the wall and floor when the last plank is being tapped into place.

Quality & Excellence Since 1938.
