SALES GUIDE

INTRODUCTION

Drain-All No-loss condensate traps provide unique, high quality, energy efficient, reliable product solutions for draining and moving liquids such as: (1) condensate removal from compressed air systems, (2) oils and lubricants from manufacturing or test equipment, and (3) liquids from atmospheric and vacuum systems. Drain-All condensate traps are produced under a certified ISO 9001 Quality Management System to ensure the product exceeds customer expectations.

Drain-All products are industrially robust, require little maintenance and since they do not require any electrical connections, can be easily installed on equipment at any point in a system. The unique design maintains a liquid barrier inside the trap which prevents the escape of costly process gas. As a result, no-loss condensate traps provide energy savings when compared to timer drains and manual valves. These patented devices are backed by an excellent warranty and a strong technical support staff who are available to assist customers in developing engineered solutions for all of their liquid drainage problems.

The Drain-All product line includes a wide array of products, options and accessories which enable customers to customize their particular liquid drainage systems. The Drain-All condensate drains are compatible with all manufactures of compressors, aftercoolers, filters/separators, receivers and dryers.
