

# California Immobilizer™

---

The Universal Coupler G00109. Adjusting Screw is shown separated from the coupler. The adjusting screw was designed for fine adjustment. Many couplers vary in the size of the dome.

The Universal coupler can be used on all of the Demco surge couplers and also on the Atwood Model 84132 & 83010 Surge Couplers. In order to make the locking holes in the upright fit better it may be better to remove the adjusting screw altogether when using the coupler lock on the Atwood surge coupler.
