

3M™ Cubitron™ II Abrasive Discs
For grinding, weld removal, deburring & more

**3M™ Cubitron™ II Fibre
Disc 982C, with 3M™
Roloc™ Quick Change
Attachment System**

Power Up

For speed, comfort and
long life, nothing else
comes close to the power
of 3M™ Cubitron™ II
Abrasive Discs!

CUBITRON™ II

3M

Now you have

Engineered to help you do more

For grinding, weld blending, deburring and other tough metal finishing jobs, 3M™ Cubitron™ II Abrasive Discs deliver outstanding performance – thanks to a breakthrough 3M technology that re-writes the rules for speed, consistency and disc life.

3M precision-shaped grains are electronically oriented to form sharp peaks that easily “slice” through metal. They stay cooler, cut faster and last longer.

A new era in abrasive performance

The first time you try Cubitron II discs, you’ll quickly see that they cut faster, run cooler and last longer than other abrasive discs in your shop.

The secret lies in the revolutionary precision-shaped ceramic grain technology pioneered by 3M. As the triangular shaped grain wears, it continuously fractures to form sharp points and edges that slice through metal, wear evenly and provide super-long life and consistency at any grinding pressure.

Conventional ceramic abrasive grain tends to “plow” through the metal, causing heat to build up in the workpiece and the abrasive – resulting in a slower cut, shorter disc life and undesirable effects, such as burnishing.

Optimized for applications including:

- Grinding
- Weld & mill scale removal
- Removing pits and surface imperfections
- Deburring
- Beveling
- Edge chamfering

the power!

Wherever the job takes you,
pack the added power of
3M™ Cubitron™ II
Abrasive Discs

Machinery Manufacturing

- Farm & construction
- Industrial
- Food processing
- Oil & gas

Transportation

- Ship and boat building
- Automotive
- Aerospace

Metal Fabrication

- Structural steel
- Sheet metal
- Machining

3M™ Cubitron™ II Fibre Discs

Cubitron II fibre discs are engineered to cut faster, cooler and with less grinding pressure than conventional abrasives. Plus they last up to 5 times longer, for increased productivity!

3M™ Cubitron™ II Fibre Disc 987C

The coolest way to increase productivity

If you work with heat-sensitive materials like stainless steel, you'll appreciate the way the 987C disc digs in and cuts faster, lasts longer and requires less grinding pressure than conventional abrasives. Some customers have seen up to 5 times the life. Try 987C for yourself and you'll see improvement over your existing fibre disc. Saves time on applications including edge chamfering, beveling, weld removal and more!

Optimized for:

- Stainless steel
- High nickel alloys
- Superalloys
- Carbon steel

3M™ Cubitron™ II Fibre Disc 987C

Tech Tip

Use 3M™ Disc Pad Face Plates – Red Ribbed to optimize product life of Cubitron II Fibre Discs – grades 36+, 60+ and 80+.

Faster Cut!

Longer Life!

3M™ Cubitron™ II Fibre Disc 982C

Dare to wear it out

With the 982C, you get a disc that cuts faster, lasts longer and requires less grinding pressure than conventional abrasives. Without increasing the grinding force you currently use, you'll get longer life and more parts with a Cubitron II fibre disc. Ideal for applications including weld grinding, beveling, flame-cut edge cleanup and deburring.

Optimized for:

- Carbon steel

Faster Cut!

Longer Life!

3M™ Cubitron™ II Roloc™ Fibre Discs

Now you can enjoy the power and performance of Cubitron II abrasives – with the convenience and time savings of the 3M™ Roloc™ Quick Change Attachment System. Discs screw securely into the threaded mandrel without tools. Ideal for applications requiring frequent grade or disc size changes.

3M™ Cubitron™ II Roloc™ Fibre Discs 982C

Cubitron II technology requires less grinding pressure than conventional abrasives – so you can remove more material with less “push.” Rigid fibre backing is tough and durable, enabling faster, more aggressive cuts.

Optimized for:

- Carbon steel

Did you know...?

While edges on the workpiece may cause premature edge wear on other discs, they can actually help precision-shaped grains fracture and extend the life of a Cubitron II Roloc Fibre Disc.

Grinding Force

982C removes as much stock with 14 lbs of force as the competitors remove with 20 lbs of force.

3M™ Cubitron™ II Roloc™ Durable Edge Disc 984F

Featuring durable edge backing – for longer edge retention. With the 984F disc, these edges actually help the precision-shaped grains fracture, extending disc life. Features a flexible, durable cloth backing that stands up to aggressive grinding applications.

Optimized for:

- Stainless steel
- High nickel alloys
- Superalloys
- Carbon steel

Tips for Best Results

For best results use Roloc™ Discs with 3M™ Power Tools. You'll maximize the benefits of 3M precision-shaped grains by using 3M Tools with the ideal horsepower and operating speeds.
