

32-000530-0000 Porta Stream III Insulated cover

This is just an insulated cover that our Porta Stream III heated unit sits into and zips closed. It does not plug in. It just helps to hold in the heat by the material it is made from. The cover helps to maintain the solution at a tepid temperature.

Made out of Vinyl, Vinyl Foam, thinsulate and PVC material

There is a hole underneath the insulated cover to allow the solution to drain out of
