Stokolan® Classic

Enriched Skin Conditioning Cream for Dry or Stressed Skin

PRODUCT DESCRIPTION

A nourishing rich skin care cream that soothes and helps the skin's natural regeneration by simultaneously providing moisture and oils. Stokolan® Classic has a proven track record over 50 years in helping to prevent occupational skin diseases. Proven very effective in helping to stop the skin from becoming rough or dry by maintaining the natural protective function of the skin.

WHERE TO USE

For use in demanding industrial and healthcare environments, especially where employees are prone to dry or stressed skin.

HOW TO USE

- Apply to clean and dry skin
- Use before any lengthy breaks and after finishing work

Use skin creams as part of a comprehensive hand hygiene program and to help prevent the onset of occupational skin disease.

FORMAT: CREAM

FEATURES	BENEFITS
Nourishing action	<ul style="list-style-type: none"> • Hydrates and nourishes deeply to promote healthy skin
Enhances the skin's natural regeneration	<ul style="list-style-type: none"> • Helps work-stressed skin to restore its natural resistance
Contains Glycerin and Urea	<ul style="list-style-type: none"> • Part of the skin's natural moisturizing factor known to have good water holding and hydrating properties • Enhances skin elasticity • Soothes the skin
Contains Lanolin of pharmaceutical quality	<ul style="list-style-type: none"> • Natural lipid known for its excellent care and skin nourishing properties • Helps restore natural oils and moisturizes to prevent dry and rough skin
Awarded with the quality seal ECARF	<ul style="list-style-type: none"> • Ideal for persons suffering from allergies and suitable for sensitive and eczema-prone skin
Silicone-free	<ul style="list-style-type: none"> • Can be used in almost any production process • No adverse effect when painting / coating surfaces

AQUA (WATER), PARAFFINUM LIQUIDUM, GLYCERIN, GLYCERYL STEARATE SE, LANOLIN , STEARIC ACID, CETEARYL ALCOHOL, UREA, POTASSIUM STEARATE, METHYLPARABEN, DEHYDROACETIC ACID, SORBIC ACID, PROPYLPARABEN, PARFUM (FRAGRANCE)

STATUTORY REGULATIONS

This product is manufactured and labeled in compliance with the Federal Food, Drug and Cosmetic Act issued by the Food and Drug Administration (FDA). Deb products are produced and tested to ensure they meet the quality requirements for registration and/or approval by the FDA.

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information, please refer to the Safety Data Sheet which can be downloaded from www.debgroup.com/us/msds.

QUALITY ASSURANCE

Deb products are manufactured in facilities which follow Current Good Manufacturing Practice (cGMP) and/or Cosmetic GMP requirements.

All raw material used for production undergo a thorough quality control process before being used for manufacturing in Deb's high quality products.

All finished goods are subject to intensive quality testing before being shipped out to our customers.

SHELF LIFE

This product has a shelf life of at least 30 months from the date of manufacture when stored unopened at room temperature.

CERTIFICATIONS

ECARF Seal of Quality: The European Centre for Allergy Research Foundation (ECARF) awards the ECARF-quality seal to allergy-friendly products. Cosmetics can receive this seal when the following criteria are met:

1. Quantitative risk assessment of the product ingredients with respect to their potential for sensitization, taking into account their specified conditions of use and amount
2. Medically supervised clinical trials by volunteers with atopic dermatitis
3. Approved system of quality control management

PACK SIZES

Stock Code	Size	Case Quantity
SCL30ML	30ml tube	100
SCL100ML	100ml tube	12
SCL1L	1 liter cartridge	6

COMPATIBILITY ASSURANCE

Skin Compatibility Test: The skin compatibility of Stokolan® Classic was tested using state of the art dermatological tests using voluntary tests panels. In these tests, as well as in practical use, Stokolan® Classic has proven to have very good skin compatibility.

Toxicological Approval: Formulation assessed by a toxicologist and declared safe to use.

MOISTURIZATION TESTS

Moisturizing Effect: In order to investigate the moisturizing properties of Stokolan® Classic the care product was applied twice daily at an interval of approx. 5 hours to the skin of 9 test persons (0.1g/cm² for 2 minutes, followed by the removal of any remains by means of a soft paper tissue).

Repetition of this application for a total of 4 days. The starting values for the skin moisture were determined in the morning by means of the Corneometer® before the first application and any changes to the skin moisture noted before the morning of the subsequent day.

Result: If Stokolan® Classic is applied twice daily this results in a continuous increase in hydration of the stratum corneum. The skin moisture is clearly improved by Stokolan® Classic while the untreated skin remains approximately on the same moisture level as it was when the experiment was started.

SKIN REGENERATIVE TESTS

Effectiveness Test: For a skin regeneration test, the skin of 15 test persons was damaged by occlusive application 0.5% sodium lauryl sulphate solution over 12 hours. The resulting damage of the skin was classified by means of two parameters: visual (VS, irritation score according to Frosch and Kligman) and by means of the trans-epidermal water loss (TEWL as an indicator of the skin barrier quality).

After recording these damage parameters (day 1) Stokolan® Classic is applied for the first time and renewed after approx. 5-6 hours on the same day. This procedure is repeated on days 2 and 3, i.e. Stokolan® Classic is applied twice daily. On day 4, the skin parameters are recorded in the morning and the skin regeneration is assessed.

Result: The use of Stokolan® Classic supports the skin regeneration, as both visually apparent damage and the barrier damage characterized by the TEWL could be much reduced by the application of Stokolan® Classic.

Improvement of skin condition - VS

Regeneration of skin barrier - TEWL
