

MirrEdge™ Acrylic Mirror Framing System Application

Getting Around Existing Mirror Clips

The ideal application when using the Acrylic Mirror **MirrEdge™** Mirror Framing System is for an existing mirror that is held to the wall with glue, without the use of mirror clips. If your mirror has standard plastic mirror clips holding your mirror in place, here's how you can apply **MirrEdge™** onto your existing mirror.

1. You will need to replace the standard plastic mirror clips with thin metal "Z-Clip" Mirror Clips.

2. Re-locate Z-Clips to edges of mirror approx. 1 inch in from the edge of mirror.

3. Apply Vertical Acrylic Mirror Framing Strips to sides of mirror up to the Z-Clips. Then apply Horizontal Framing Strip in between vertical strips and even with the top of the Z-Clips.

4. Apply Acrylic Mirror Corner Plates in corner areas on top of Acrylic Mirror Strips where the vertical and horizontal framing strips meet in each corner which covers the Z-Clips!

- ONLY USE NON-AMMONIA BASED CLEANERS TO CLEAN ACRYLIC MIRROR STRIPS & PLATES**
- USE Liquid Nails® LN-700 ADHESIVE GLUE RECOMMENDED (SOLD SEPARATELY) IN ADDITION TO SUPPLIED DOUBLE FACED TAPE SQUARES TO APPLY FRAMING STRIPS AND PLATES TO MIRROR**
- Believe it or not, Pledge® Furniture Polish Works GREAT To Clean Acrylic Mirror!*
