

VTLR

Volumetric Relight Kit

Relight in Style and on Budget

The VTLR is a specification grade relight kit from Lithonia Lighting®. VTLR offers a simpler, faster solution to upgrade existing fluorescent parabolics to high-efficiency volumetric LED lighting in Class A spaces. The VTLR refreshes your space with improved quality of light without the need to remove the host fixture. Multiple lumen packages, eldoLED® high-performance driver options and nLight® lighting controls options further enhance energy savings and design flexibility.

Easy installation

Low glare with classic aesthetics

Replaces parabolic and troffer systems

Environmentally friendly

Standard kit is UL approved for air-handling host fixtures

Embedded wireless nLight® lighting controls

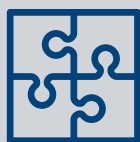

Volumetric Design

Universal End Bracket

Embedded nLight Lighting Controls

eldoLED®

Complete Outfit

The VTLR, LED Relight kit, is part of the VT family of volumetric lighting solutions. In this family is the VTL volumetric troffer, the VTLX surface-mount LED troffer and the STL suspended linear wraparound.
