HEALTHCARE FACILITIES

Portable Cooling and Solutions for Healthcare Facilities.

MovinCool portable spot air conditioners provide emergency backup, supplemental or permanent cooling for people and equipment in healthcare facilities.

Applications

- **Emergency Preparedness** — when your main HVAC system goes out, rely on MovinCool to provide continuous cooling relief to patients and staff — or protect heat-sensitive equipment from malfunctioning or shutting down.
- **Supplemental** — when an emergency room gets hot or overcrowded, or an MRI room or other imaging center needs additional cooling to keep running smoothly, wheel in MovinCool to quickly bring things under control.
- **Permanent** — for areas your main HVAC system does not reach or is inadequate, or to provide cooling to heat-sensitive equipment during cold-weather months when the main HVAC is switched to heating mode, MovinCool is a flexible, cost-effective solution.

Roll it in. Set it up. Turn it on.

Ideal for . . .

Hospitals*
Emergency rooms
Urgent care Facilities
Doctor offices
Laboratories

MovinCool is a brand of DENSO Corporation, the world's largest manufacturer of spot air conditioners. MovinCool spot air conditioners and heat pumps are backed by a full three-year on-site parts and labor warranty — the strongest in the industry.

Another line of quality products by DENSO.

DENSO

*MovinCool units are manufactured for general purpose use to control the temperature of the environment. While they contain both condenser and evaporator intake air filters, they do not incorporate any medical grade filters (ie, HEPA) or purification features. If using in a healthcare or medical setting, your facilities management professional should confirm that use of these units is appropriate and will meet applicable health-related requirements.
