INSTALLATION, OPERATIONS AND MAINTENANCE MANUAL

6900-206-001 April 2019

Important: Some options may slightly alter installation. To ensure proper installation review the Manual thoroughly and verify rough-ins before beginning any work. File this Manual with the owner or maintenance personnel upon completion of installation.

Industry standard wall backing, for wall hung fixtures, is required. Installer provided wall anchors and wall anchoring hardware with a minimum Pull-Out Force of 1000 pounds (lbs) per anchor for appropriate wall construction.

ANSI, UFAS or ADA compliance is subject to the interpretation and requirements of the local code authority and is the responsibility of the installer for verification.

Single Temp Valve Assembly: Recommended working water pressure is 30 PSI (2.07 bars) minimum to 100 PSI (6.89 bars) maximum. Maximum temperature is 130°F (54.4°C). Maximum outlet temperature recommended is 105°F (40.6°C). Valve assembly must be drained prior to being subjected to freezing temperatures. A checkstop is provided with this valve assembly.

T/P Mixing Valve Assembly: Recommended working water pressure is 30 PSI (2.07 bars) minimum to 100 PSI (6.89 bars) maximum. Maximum hot water temperature is 180°F (82°C). Temperature adjustment range is 85°F-115°F (29°C-46°C). Minimum hot water supply temperature must be 5°F (3°C) above desired set temperature. Valve assembly must be drained prior to being subjected to freezing temperatures. The valve assembly has checks integral to the inlets however, angle stops are to be provided by the installer.

Prior to installation, supply lines must be flushed of all foreign material such as pipe dope, chips, or solder. Debris or foreign material in water supply may damage valve.

Teflon tape is recommended on threaded connections where applicable to reduce the possibility of leaks.

Provide 110-120 VAC/60Hz/3A (MAX) electrical receptacle for factory supplied 120VAC/9VDC, 100mAplug-in transformer.

NOTE: Receptacle(s) must be wired to a GFCI protected circuit. Fixture must be earth grounded per N.E.C. (National Electrical Code).

Upon receiving, verify count and inspect packaging for obvious signs of damage or missing containers. If there are any issues upon receiving make note on bill of lading and report to carrier and manufacturer promptly. Remove fixture assemblies from packaging and ensure all parts are present before beginning installation. Do not discard packaging until all parts have been accounted for. Refer to Acorn terms, conditions of sales and warranty for more information.

Required Items for Installation - Not Supplied

- ∠ Hammer

- I/2" NPS Flexible Supply Hose (For -MXTP Valves Only)
- ✓ 7/16" Hex Wrench

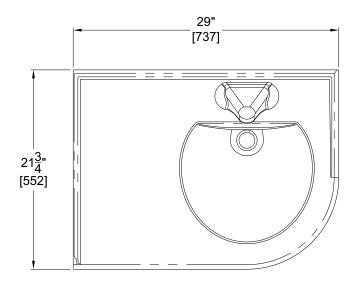

- 🖉 Teflon Tape
- Service Wall Anchors and Anchoring Hardware
- (and Appropriate Tools) For 3/8" (9 Places) & 1/4" Punching (3 Places)
- Shank Bit For Center Reject Bit

WHITEHALL MANUFACTURING • P.O. BOX 3527 • City of Industry, CA 91744-0527 U.S.A Phone (800) 782-7706 • (626) 968-6681 • Fax (626) 855-4862 • Web: www.whitehallmfg.com

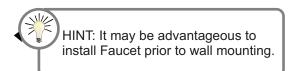

Instructions for Operation and Care of Best-Care WH3776

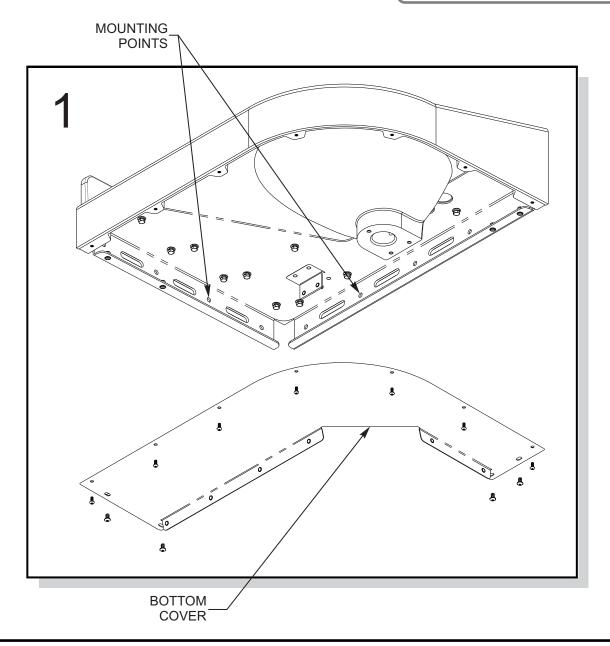

WHITEHALL MANUFACTURING • P.O. BOX 3527 • City of Industry, CA 91744-0527 U.S.A Phone (800) 782-7706 • (626) 968-6681 • Fax (626) 855-4862 • Web: www.whitehallmfg.com

FIXTURE ANCHORING

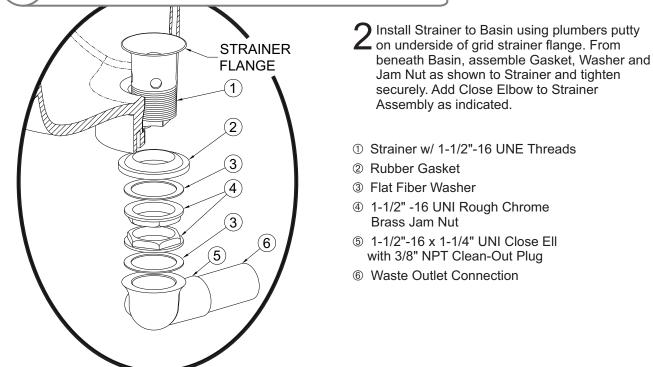

Disassemble Bottom Cover from Deck Assembly by removing #10-32 x 1/2" (Qty. 7) and 1/4-20 x 1/2" (Qty. 4) Hex Button Head Center Reject Screw. Locate and anchor the basin to the finished wall using mounting hardware by others, refer to dimensional data for rough-in information. 3/8" wall anchors with min. Pull-Out Force of 1000 lbs per anchor required for fixture mounting. Assemble waste assembly and make appropriate connections. Test for leaks for usage.

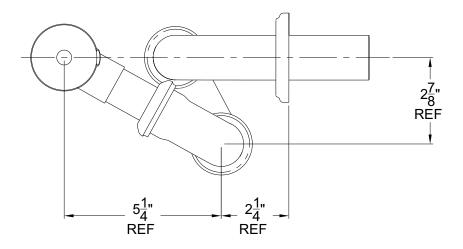

WASTE ASSEMBLY

HINT: Teflon tape is recommended on all Threaded Waste and Supply Connections.

NOTE: Waste Assembly may require field cutting and fitting by the installer.

3 Assemble waste piping using teflon tape on all threaded connections and make up waste connections to 1-1/2" P-trap.

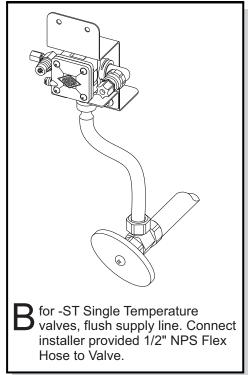

VALVE INSTALLATION

Before making up the supply connections, the supply lines must be flushed of all foreign material such as pipe dope, pipe chips, solder, sand, etc.

A for MXTP Valve (Hot & Cold), flush supply lines. Connect installer provided 1/2" NPS Flex Hoses to Valve.

-03-M SINGLE TEMPERATURE METERING VALVE

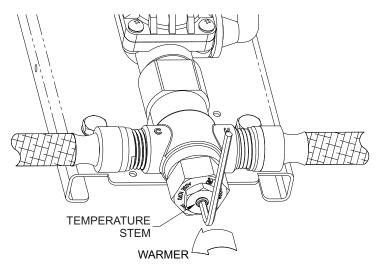

VALVE INSTALLATION & ADJUSTMENT

Valve Assembly Installation:

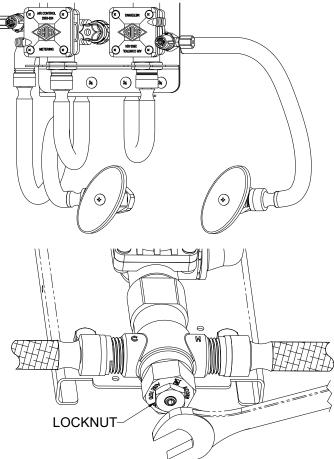

NOTE: Installation should be in accordance with accepted plumbing practices.

- Locate suitable place for mounting the Valve Assembly. Valve Assembly should be accessible for service and adjustment and as close to the point-of-use as possible. Wall Anchors and Anchoring Hardware are by others.
- 2) Connect hot and cold water to Supply Valve using 1/2" NPTE connections.
- Connect outlet of Tempering Valve to Spout(s) using 1/4" O.D. Tube connections provided.
- Turn on hot and cold water supplies. If any leaks are observed, hand-tighten connections as necessary to stop leaks before proceeding.
- 5) Turn on fixture and allow water to flow for 2 minutes. Measure water temperature at outlet. If water is not at desired temperature, adjust as necessary.

HINT: Angle Stops are recommended and is the responsibility of the installer.

Flush supply lines of all foreign material such as pipe dope, pipe chips, solder, sand etc. before making up supply connections.

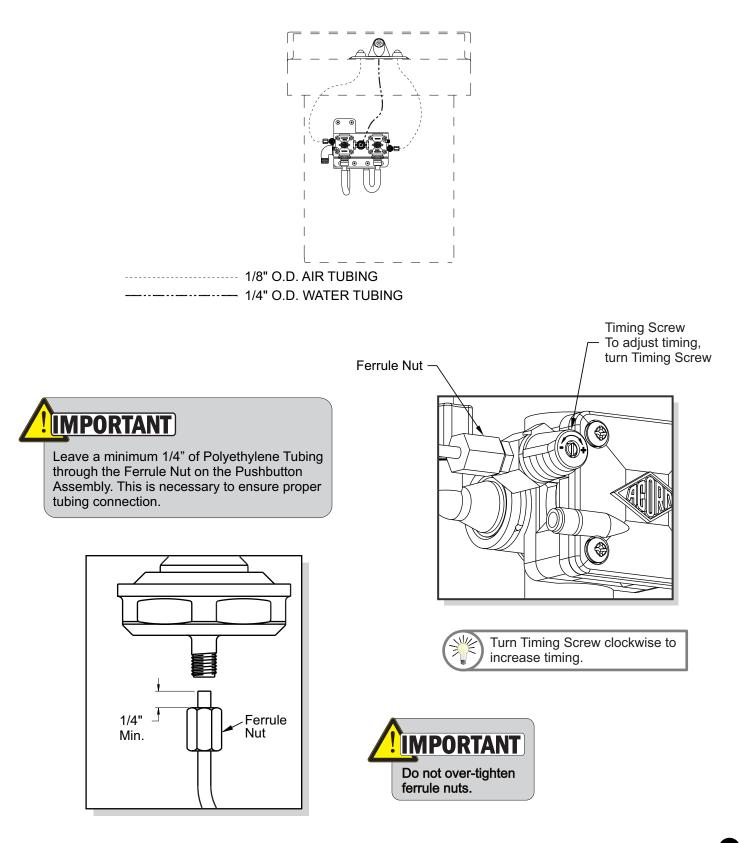

Temperature Adjustment:

NOTE: Factory set temperature is 105° F

- 1) Loosen Locknut.
- 2) Turn on fixture and run water for at least 2 minutes. Allow supply temperature to stabilize.
- Turn temperature stem counter-clockwise for hotter or clockwise for colder outlet temperature.
- 4) Tighten Locknut to prevent accidental or unauthorized temperature adjustment.
- 5) Re-check outlet temperature.

VALVE CONNECTIONS

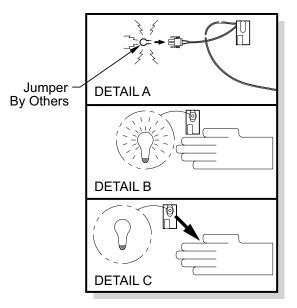

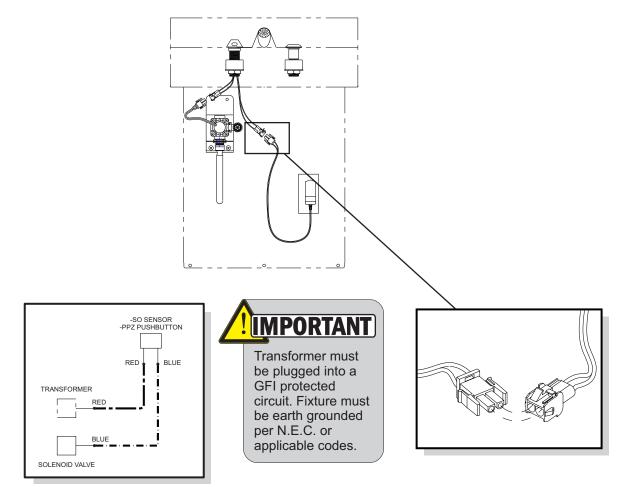

SENSOR OPERATION & CONNECTIONS

-SO Sensor Operation Range Adjustment

- 1. Make sure Power Supply is disconnected from Sensor and make short circuit on red wires. See DETAIL A.
- 2. Connect Power Supply to Sensor. Red light should be flashing.
- Move hand in front of sensor to distance of 2" to 4" within 5 seconds and wait until red light flashes quickly.
- 4. Move hand to desired sensing distance. See DETAIL B.
- Hold hand at desired sensing distance until red light stops flashing and Solenoid activates. See DETAIL C.

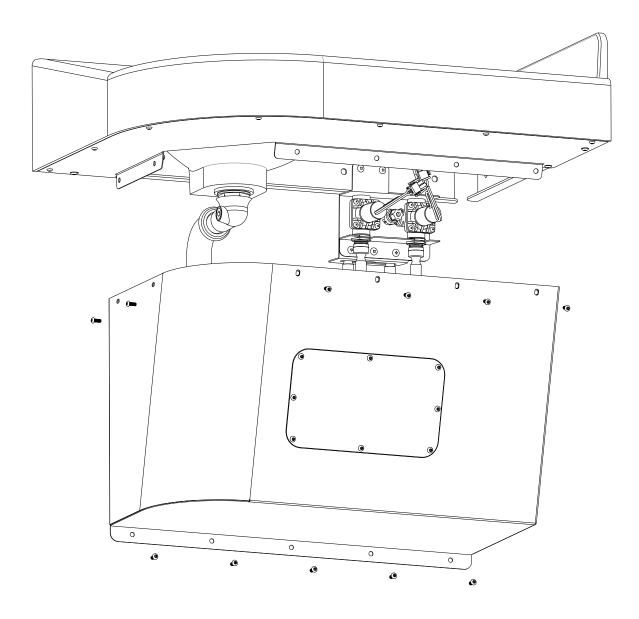

-SO Sensor Operation or -PPZ Programmable Piezo Pushbutton

P-TRAP COVER INSTALLATION

Install P-Trap Cover using #10-32 UNF x 1/2" Center Reject Hex Head Screws provided. Secure bottom of P-Trap Cover to wall with Anchoring Hardware (by others).

TROUBLESHOOTING FOR OPTIONAL PUSHBUTTON OPERATED VALVES

Normal Valve Function: Pushbutton Operated Valve has an adjustable flow time from 5 to 60 seconds.

CONDITION: WATER DOES NOT FLOW		
Probable Cause	Solution	
Water main closed	Open water main	
Checkstops closed	Open checkstops	
Debris or scale in Checkstop Strainer	Remove Checkstop Strainer and clean	
Air leaks from 1/8" O.D. Tubing or Fittings	Replace damaged Tubing or Fitting	
Pushbutton Air Diaphragm leaks	Replace Pushbutton Air Diaphragm	
Servomotor Diaphragm center hole is blocked	Remove blockage	
Servomotor Upper Diaphragm is damaged	Replace Servomotor Upper Diaphragm	
Low or no water pressure at supplies	Increase water pressure to 30 PSI minimum	
CONDITION: WATER DRIPS, WON'T SHUT OFF		
Probable Cause	Solution	
Servomotor Diaphragm offset hole is blocked	Remove blockage	
Servomotor Seat is damaged	Replace Servomotor seat	
Servomotor Plate or Diaphragm is obstructed	Remove cause of obstruction	
Servomotor Timer Assembly is damaged	Replace Servomotor Timer assembly	
CONDITION: REDUCED WATER FLOW		
Probable Cause	Solution	
Valve Riser Tubing is crimped	Straighten Valve Riser Tubing	
Debris or scale in Checkstop Strainer	Remove Checkstop Strainer and clean	
Blockage in Valve Flow Control	Remove blockage	
Low water pressure at supplies	Increase water pressure to 30 PSI minimum	
Lime deposits in hot water pipes	Remove lime deposits with appropriate cleaning solution	
CONDITION: PREMATURE WATER SHUT OFF		
Probable Cause	Solution	
Air leaks from 1/8" O.D. Tubing or Fittings	Replace damaged Tubing or Fitting	
Pushbutton Air Diaphragm leaks	Replace Pushbutton Air Diaphragm	

CARE, CLEANING, AND REPAIR OF CORTERRA SOLID SURFACE

Acorn's Corterra densified solid surface material is composed of recycled Solid Surface Polymer Resin, Aluminum Trihydrate and Fillers. It is resistant to stains, impact and burns and complies with ANSI Z124.3. It is attractive, durable and easy to maintain.

Routine Cleaning

Corterra should be kept clean at all times. If maintained, Corterra surfaces will retain their new, clean appearance indefinitely. Wash with a non-abrasive all purpose cleaner and water, then rinse. Wipe dry. (Never use cleaners with strong chemicals such as toilet bowl cleaners, rust removers, ceramic cook top cleaners, laquer thinners or oven cleaners). To remove persistent stains use a Scotch Brite pad and an abrasive cleaner or a solution of household bleach and water (1 part water to 1 part bleach).

Repairing Surface Damage

Surface damage, such as minor chips, scratches, burn marks and graffiti can be repaired with a fine grit abrasive cleanser, such as a Scotch-Brite pad or fine grit sandpaper. For more serious physical damage caused by vandals, an Acorn Solid Surface Repair Kit is available. Contact the factory for details. Refer to drawing #9927-160-002.

CARE AND CLEANING OF ENVIRO GLAZE/ POWDER COATING

Recommended Cleaning Materials:

- Sponge natural or artificial
- Nylon or other soft-bristle brush
- Microfiber Cloth

Recommended Cleaning Solutions:

- Hand dishwashing liquid / soft water solution
- Mild soap / soft water solution
- Soft-Scrub®
- Comet Soft Cleanser ®
- Clorox®
- Scrubbing Bubbles ® Gel

Normal Cleaning:

For everyday cleaning, use a sponge or cotton cloth soaked in mild soap and wipe-down surface. In industrial or marine locations, close attention should be paid to regular care due to harsher atmosphere.

To remove dirt and debris:

Fixture should be periodically washed with a diluted solution of a mild non-abrasive detergent (e.g. Dawn ®) in cold or ambient temperature water using a soft non-abrasive cloth or chamois.

MANUFACTURER'S WARRANTY

Go to www.whitehallmfg.com to fill out eWarranty Registration, keyword search: WARRANTY.

Whitehall Manufacturing Company warrants that its products are free from defects in material or workmanship under normal use and service for a period of one year from date of shipment. Whitehall's liability under this warranty shall be discharged solely by replacement or repair of defective material, provided Whitehall is notified in writing within one year from date of shipment, F.O.B. Industry, California.

This warranty does not cover installation or labor charges, and does not apply to materials which have been damaged by other causes such as mishandling or improper care or abnormal use. The repair or replacement of the defective materials shall constitute the sole remedy of the Buyer and the sole remedy of Whitehall under this warranty. Whitehall shall not be liable under any circumstances for incidental, consequential or direct charges caused by defects in the materials, or any delay in the repair or replacement thereof. This warranty is in lieu of all other warranties expressed or implied. Product maintenance instructions are issued with each fixture, and disregard or non-compliance with these instructions will constitute an abnormal use condition and void the warranty. If you have any questions or require technical assistance, please call 800-743-8219.

NOTICE TO KEEP ORIGINAL PACKAGING- Regarding warranty claims: customer must retain original packaging for one year upon receipt of product. If packaging is discarded, it is the customer's responsibility to provide adequate packaging. Any shipping claims that are a direct result of customer-provided packaging materials will be handled by the shipper.
