

Quantum® ELMRE

Contemporary Commercial LED Emergency Remote Lights

Life Depends on It

The Lithonia Lighting® emergency line of products has expanded to include newly designed Quantum® indoor remotes. The ELMRE is designed to match the appearance of the Quantum units to use as part of an emergency lighting system, providing light for the path of egress. With fully adjustable or fixed optics, these compact and low-profile remotes provide high-quality light output when it is needed most.

The optical performance of the Quantum® series has raised the bar for path of egress coverage and spacing, allowing fewer products to do the same job, reducing the total product needed and lowering installation time and costs.

Features and Benefits

- UL damp location listed standard
- Wet location listed when used with the WPVS accessory
- Fixed and adjustable optics
- Universal DC Voltage to accompany multiple battery voltages
- Compatible with self-diagnostics units
- Flexible conduit entry provision for easy wall or ceiling mount installation
