

## Color-Coded Hygienic Tools

- Shovels
- Scoops
- Mixing Paddles
- Scrapers
- Squeegees
- Brushes
- Brooms
- Tool Hangers

Color-coding helps ensure food-processing tools are properly handled to mitigate cross-contamination. No other color-coding system offers more high-performance tools in more colors than Remco and Vikan brands combined. With a full range of FDA-compliant shovels, brooms, squeegees, brushes, and more, we can partner with you to develop a successful color-coding system that supports strict food safety regulations.

Waterfed System

Remco offers a wide range of brush, squeegee, and handle styles to meet the varying demands of food processors.

Choose the brush that best fits the application:

**SOFT** — Ideal for sweeping dry, fine particles like flour and sugar.

**MEDIUM** — Suitable for wet or dry applications; great for sweeping larger food particles such as peelings.

**STIFF** — Perfect for scrubbing difficult dirt and for wet use with cleaning agents.

**SOFT /STIFF COMBO** — The best of both worlds offering stiff bristles that loosen stubborn dirt and soft bristles that sweep away fine particles.

**SOFT/SPLIT** — Split bristle fibers hold more water and cleaning agent to achieve a maximum washing effect.

Choose the handle that best fits the application:

**ULTRA HYGIENE** — Composed solely of FDA compliant polypropylene, this handle is uniquely hygienic and durable in its construction. It

also boasts the added benefit of coming in total color, making it an excellent choice for inclusion in a color-coding system.

**FIBERGLASS** — Fiberglass handles are a total color option.

**ALUMINUM** — Aluminum handles are a solid option in any hygiene sensitive environment. Aluminum provides

a cost effective and reliable solution to a facility's needs.

**STAINLESS STEEL** — Stainless steel handles can hold up to the most aggressive chemicals, making

them a great choice for environments where chemical resistance is critical.

Choose the blade that best fits the application:

**SINGLE BLADE ULTRA HYGIENE** — Zero seams or cracks for bacteria to hide, providing the highest level of hygiene. The

hygienic design has smooth, rounded surfaces with elongated ends to protect the rubber blade and guard against splashes.

**DOUBLE BLADE ULTRA HYGIENE** — Efficient in areas such as large food production facilities, collecting every particle with flexible

non-porous rubber blades. These squeegees feature replaceable rubber cassettes designed to move liquids and debris on tiled, uneven surfaces.

**DOUBLE BLADE FOAM RUBBER** — The foam rubber blades make this squeegee the most effective at

moving large amounts of liquid on smooth and tiled surfaces. The soft rubber efficiently reaches into all spaces on floors, such as grout lines.
