

We offer both versions of ALTRAGRIPS-LITE™ to our crews. Both are lightweight and extremely easy to use. The **High Profile** is issued to those who need more traction for extensive outdoor walking. The **Low Profile** is perfect for those who are exposed to ice and snow but also operate vehicles or walk back and forth indoors and out throughout the day. The ALTRAGRIPS-LITE™ has been a unique addition to our safety program.

Maximum Retention Studs

The studs on ALTRAGRIPS-LITE™ are permanently sealed into the sole of the device. This maximizes retention and eliminates the need for replacement studs.

Patented Dual Pull Tab

Allows the user to grip the rear tabs with both hands in order to stretch and expand the device for the easiest on and off.

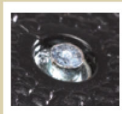

Full Heel Cup & Heel Strike Spike

Features a full heel cup for maximum balance. Heel strike spike is placed in the rear most portion of the heel to ensure traction with the first contact made during each step.

ALTRAGRIPS-LITE™ All-Traction™ Footwear fits over the shoe and is designed to increase traction in a variety of outdoor slippery conditions. The sole of ALTRAGRIPS-LITE™ features 16 steel encased tungsten carbide studs that are available in two different heights offering a choice of increased traction or increased versatility:

LOW PROFILE STUD [MODEL JD3615]: The low profile stud protrudes only minimally (approximately 1mm) from the sole of ALTRAGRIPS-LITE™. This enables the device to increase traction in outdoor walking conditions while remaining safer to wear in door and normal conditions than most studded and spiked footwear.

HIGH PROFILE STUD [MODEL JD36159]: The high profile stud is more pronounced and exposed (protruding approximately 3mm) from the sole of ALTRAGRIPS-LITE™. This enables a more aggressive level of traction. The high profile stud is not recommended for indoor or normal walking situations.

SIZE CHART

MODEL	SIZE	FITS MEN'S	FITS WOMEN'S
JD3615 / JD36159	XS	---	4½-6½
JD3615 / JD36159	S	5-7½	7-9½
