

ALTRAGRIPS™

ALTRAGRIPS™ All-Traction™ Footwear is designed to increase traction in a variety of slick conditions ranging from outdoors in ice and snow to indoors in chemicals and fats.

Constructed of an industrial-grade PVC, ALTRAGRIPS™ fits over all types of normal work shoes and boots. The traction comes from the 48 tiny tungsten carbide studs that line the soles of ALTRAGRIPS™. The tungsten carbide studs are available in both low profile and high profile heights for different walking conditions.

TRAINING VIDEO: LEARN MORE ABOUT HOW ALTRAGRIPS™ CAN REDUCE YOUR COMPANY'S SLIPS AND FALLS. MAXIMIZE THE EFFECTIVENESS OF YOUR ALTRAGRIPS™ PROGRAM BY TRAINING ALL ALTRAGRIPS™ USERS. **VIDEOS ARE FREE UPON REQUEST.**

DISTINCTIVE FEATURES

Patented Angle Tread™

The Angle Tread™ maximizes contact with the walking surface by matching the grit-bars to the alignment of the metatarsal bones of your foot.

Patented Trim-Line™

The Patented Trim-Line™ feature allows you to cut away a portion of the upper part to expand the opening for larger and bulkier boots including metatarsals.

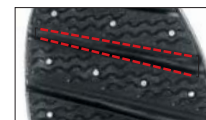

Defined Heel

All styles of ALTRAGRIPS™ offer a defined heel to aid in any type of on-the-job climbing that might be necessary.

Expansive Opening and Inside Spray Coating

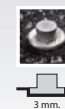

ALTRAGRIPS™ 10" and 15" boots feature a larger-than-normal opening and shaft as well as a proprietary inside spray coat to facilitate easy-on, easy-off.

The Angle Tread™ also helps to keep the sole of ALTRAGRIPS™ free of build-up through its self-cleaning design. The alternating grooves start off narrow and shallow at the instep, but gradually widen and deepen toward the outer edge. This helps to dictate the flow and elimination of contaminants such as snow and slush.

1 mm.

3 mm.

LOW PROFILE STUD // The low profile stud is designed to increase traction in both outdoor and indoor walking situations and provides effective traction in conditions such as ice, snow, slush, chemicals, fats and free-standing water. Because the low profile studs protrude only minimally above the sole of ALTRAGRIPS™, they are safe for most indoor walking conditions as well as for wearing while driving. **[Available in models JD9150, JD9250, JD10250]**

HIGH PROFILE STUD // The high profile stud is designed to offer a more aggressive level of traction. It is most effective in harsher outdoor environments where snow, ice and slush abound. **[Available in models JD915, JD925, JD1025]**
