Guide**
For Cars and Light Trucks

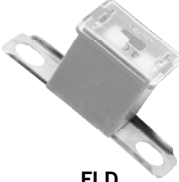

Automotive Electrical Circuit Protection

Today's automotive electrical systems are extremely complex. Virtually all late model vehicles have multiple components that protect circuits from overload or short circuits. The illustrations below show the different types of components used to protect electrical circuits. *(Illustrations are not actual size.)*

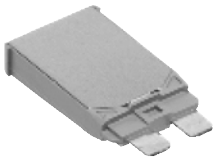

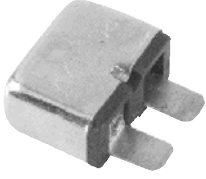

Fuses

| | | | |

Cooper Bussmann circuit protection solutions comply with major industrial standards and agency requirements such as: BS, IEC, DIN, UL, NEMA, SAE, CSA, CE, C-UL, etc. and are manufactured at facilities that are ISO 9000 certified.

This selection guide is intended to present product application information that will help the end user with purchase decisions. Cooper Bussmann reserves the right, without notice, to change design or construction or any products and to discontinue or limit distribution of any products. Cooper Bussmann also reserves the right to change or update, without notice, any information contained in this guide. Once a product has been selected, it is the user's responsibility to decide if it is correct for the intended application. Further, Cooper Bussmann takes no responsibility for errors or omissions contained in this guide, or for misapplication of any Cooper Bussmann product. Extensive product information is available in the Cooper Bussmann product data sheets available online at www.cooperbussmann.com.

Replacement Guidelines

Select your vehicle's make in the Table of Contents and go to that page.

Find the component in need of service. If your component is not listed, see **Glossary of Components** on the next page.

Once you have selected the component, look for the type of fuse you need. The fuse part number consists of three letters followed by – ampere. More than one fuse may be used on a component. The symbol following the fuse type and size indicates where the fuse is located:

- ★ indicates the fuse is in your vehicle's engine compartment fuse block.
 - indicates the fuse is in your vehicle's trunk.
 - ◆ indicates the fuse is located under the rear seat.
- No symbol indicates the fuse is in your vehicles' passenger compartment.

For types of fuses, see **Automotive Electrical Circuit Protection** on Inside Front Cover.

Replace the fuse with the **exact** ampere rating as the original.

If current is not restored to the circuit after replacement there is a possibility of;

- A short circuit, or
- A component which provides secondary circuit protection (such as a fusible link) needs to be replaced. Use proper diagnostic equipment along with the circuit wiring diagram to find the problem and make the repair.

REMEMBER: Use extreme caution when attempting to service or repair any electrical circuit.

Cooper Bussmann® Products and Technical Expertise Delivered Worldwide

Customer Assistance

Customer Satisfaction Team

The Cooper Bussmann® Customer Satisfaction Team is available to answer questions regarding Cooper Bussmann products and services. Calls should be made Monday – Friday, 8:00 a.m. – 4:30 p.m. for all US time zones.

The Customer Satisfaction Team can be reached via:

- Phone: 636-527-3877
- Toll-free fax: 877-359-2675
- E-mail: busscustsat@cooperindustries.com

Emergency and After-Hours Orders

To accommodate time-critical needs, Cooper Bussmann offers emergency and after-hours service for next flight out or will call. Customers pay only standard price for the circuit protection device, rush freight charges and a modest emergency fee for this service. Emergency and after-hours orders should be placed through the Customer Satisfaction Team. Call:

- Monday – Friday, 8:00 a.m. – 4:30 p.m. Central Time
636-527-3877
- After hours 314-995-1342

Application Engineering

Application Engineering assistance is available to all customers. The Application Engineering team is staffed by degreed electrical engineers and available by phone with technical and application support Monday – Friday, 8:00 a.m. – 5:00 p.m. Central Time.

Application Engineering can be reached via phone, fax or email:

- Phone: 636-527-1270
- Fax: 636-527-1607
- E-mail: fusetech@cooperindustries.com
