Spill Control Products and Kits

Why SPC Products?

For more than 30 years, SPC products have helped customers protect against leaks, drips and spills that create safety hazards in the workplace. Brady provides high-quality service, application expertise and product knowledge to SPC distributors and customers.

Brady SPC has a history of innovation and continues to develop industry-leading products and applications. With an ever expanding portfolio, we are committed to providing our customers with the right product for the right application at the right price point.

Brady SPC—An Environmentally Friendly Company

Corporate social responsibility is at the core of the Brady SPC business! In fact, 97% of material is reused to reduce landfill waste. Brady SPC strives to become a zero waste facility through the conservation of energy and the recovery of resources.

Why Is Spill Control Important?

Beyond the obvious need to protect our environment and to reuse or recycle, a proper spill control program can create a safe and productive work environment for your employees.

By complying with EPA and OSHA regulations around spill control we provide our people with conditions that allow for the greatest productivity and limit equipment down time. The cost of non-compliance around this area of regulation can have devastating effects on a business' reputation and financial performance.

Spill Prevention Control & Countermeasure (SPCC) Plan

The EPA issued its final rule amending the SPCC under the authority of the Federal Water Pollution Control Act. This regulation became effective as of August 16, 2002.

What is an SPCC Plan?

An SPCC plan is a facility-specific, comprehensive plan outlining both the containment and countermeasures implemented to prevent a spill from occurring and a series of response procedures in the event that one does.

The SPCC plan addresses the following three areas:

- Operating procedures that prevent oil spills
- Control measures installed to prevent a spill from reaching the environment
- Countermeasures to contain, clean-up and mitigate the effects of an oil spill that reaches the environment

Regulations

The following OSHA and EPA regulations protect your employees and the environment;

29 CFR 1910.22(a)(2)

Clean, dry workplace floors.

40 CFR 112.7(c)(1)(vii)

Absorbent materials are one option for preventing oil spills from reaching waterways.

29 CFR 1910.120(j)(1)(vii)

DOT-specified containers and suitable quantities of absorbents shall be kept available for response to spills.

Cost Savings

More and more industries are using a variety of absorbents for the control and clean-up of oils, industrial liquids and chemicals in their workplace. They reduce cost, increase productivity and improve safety. See why Brady's SPC absorbents are the product of choice!

The examples below show how much money an average facility can save by switching their spill control products to SPC absorbents.

Cost Comparison #1: Absorbent Materials

	Clay	SPC Absorbents	Your Costs
Cost per bag or box	\$5.00	\$75.00	
Absorbency (gallons per package)	4	40	
Total bags or boxes of absorbent required	375	38	
Total	\$1,875.00	\$2,812.50	

Cost Comparison #2: Labor Costs

	Clay	SPC Absorbents	Your Costs
Estimated minutes per gallon to clean-up	3.0	1.0	
Total man-hours to clean-up	75	25	
Average hourly wage & benefits	\$20.00	\$20.00	
Total	\$1,875.00	\$500.00	

Cost Comparison #3: Disposal Costs

	Clay	SPC Absorbents	Your Costs
Number of drums required	76	24	
Estimated cost per drum	\$60.00	\$60.00	
Total drum cost	\$4,560.00	\$1,440.00	
Disposal cost per drum	\$150.00	\$150.00	
Total	\$15,960.00	\$5,040.00	
Grand Total	\$19,335.00	\$8,352.50	

Comparison is based on a facility with 1,500 gallons of spill clean-up per year. The values included in this cost comparison are based on the products' average costs as published online in 2013.

SPC Absorbents Cost Savings vs. Clay

\$10,982.50 57% Savings

Did You Know? SPC Absorbents vs. Clay

There is a negative financial impact of using clay to clean-up your leaks, drips and spills. It may be cheaper to buy, but the benefits stop there.

Still not convinced? Consider these points:

- OSHA considers silica a serious health hazard.
- Granular clean-up is difficult and labor intensive. The small particles can easily enter and damage machinery or your finished product.
- Clay has limited chemical resistance.

With Brady's SPC Absorbents, all of these shortcomings are eliminated!

Think you're using the correct absorbent? Put it to the test!

Want to know if your absorbent is working for you? Start at the end, in the trash. One of the best ways to pick the right absorbent is to see what it looks like when you're done with it. Take a look...

Check Product Type

Looks like this absorbent roll is being used to contain a leak – instead, consider using a SOC for leaky equipment.

Brady SPC offers pads, rolls, SOCs, pillows and more so that you have the right type of product to contain your spill.

Check Durability

Are your absorbents falling apart or tearing due to heavy traffic?

Look for absorbents with spunbond coverstock construction when durability is critical.

Check Absorbency

Are your absorbents being used to their absorbency capacity? Or maybe your current absorbent isn't absorbing the whole spill.

For small spills, choose a medium or lightweight pad to avoid wasting.

For large spills, use a heavyweight pad to cut down on the number of lighter pads you go through.

Not Sure Which Absorbents To Use? Consider A Survey!

We understand that surveying a facility for potential trouble spots, proper absorbent usage and product selection can be extremely time consuming and confusing. But we also believe that it can be extremely beneficial.

• Free Absorbent Survey

Brady's Absorbent Survey is a free service designed to help a facility keep its employees and its equipment safe. This detailed survey asks the right questions and identifies how Brady SPC and its distributor can provide solutions for the proper use of absorbents in the plant. Many organizations use these surveys as an "Environmental Audit" and keep them on file.

• Cost Savings Worksheet

Seeing is believing! This simple worksheet helps you compare the absorbents you are currently purchasing with our recommendations – quickly showing you the price difference and your cost savings.

Contact your Brady SPC Representative for more information, for assistance in selecting the right product or to set up you FREE Absorbent Survey!!

Choosing Your Absorbents

Selecting the right absorbent for the job makes a big difference. Proper product selection can make your employees' jobs easier, create a safer work environment, and save you money!

These three easy steps will help you find the correct SPC absorbent product for your application.

1 Step One: Know What You're Absorbing

Your Spill:

- Coolants
- Solvents
- Gasoline
- Vegetable oil
- Kerosene
- Other water-based fluids

Your Absorbent Solution:

Universal Absorbents

All-purpose products that clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Use around machinery, under leaky pipes, in messy traffic areas or for general maintenance projects. Re-Form™ universal absorbents made of recycled materials offer an environmentally friendly solution.

Page 8

Your Spill:

- Hydraulic oil
- Motor oil
- Brake fluid
- Cooking oil
- Turpentine
- Other oil-based fluids

Your Absorbent Solution:

Oil Only Absorbents

Specialized for oil and other petroleum-based spills including paints and non-water soluble chemicals, these absorbents will not absorb water and will float indefinitely. Re-Form™ oil only absorbents made of recycled materials offer an environmentally friendly solution.

Page 20

Your Spill:

- Aggressive chemicals
- Citric acid
- Sodium hydroxide
- Other unknown chemicals

Your Absorbent Solution:

Chemical Absorbents

Surfactant-treated polypropylene absorbents can be used on a wide range of chemicals, including hydrofluoric acid. They are chemically inert, so they will not react with aggressive fluids.

Page 30

2 Step Two: Identify Your Absorbent Application

Wiping, Dripping or Foot Traffic Applications

Pads & Rolls

Use for wiping, dripping and leaks. Pads are pre-cut, while rolls allow you to choose the length you need.

SOCs & Pillows

Specialized for use around or underneath equipment.

Barrier-Backed or Heavy Traffic Applications

Mats & Rugs

Use with heavy foot or vehicle traffic, or where a barrier-backed mat is needed.

Emergency Spill Response

Spill Containment and Spill Kits

Be prepared for emergency spills with a variety of bundled spill kits carefully configured with our most popular products.

Additional spill control products are available including spill pallets, drain plugs and absorbent storage centers.

Perforation Guide

3 Step Three: Select Your Absorbent Size and Weight

Now that you know what you're absorbing, and what style of product you need, you can choose your absorbent from the many sizes and absorbency weights that Brady SPC offers.

Quickly and easily compare absorbents in the following sections:

UNIVERSAL

ALL-PURPOSE INDOOR SPILL CONTROL

Universal Absorbency:

Use these all-purpose absorbents to clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Around machinery, under leaky pipes or fittings, in messy traffic areas, for general maintenance projects – they are your first choice for indoor spill control. Plus, their gray color masks spills and stains – helping you resist the urge to pick up the absorbent before it is fully saturated.

Looking for added cost savings? Select a perforated option that allows you to use only what you need.

Common Liquids Absorbed:

- Coolants
- Solvents
- Oils
- Gasoline
- Vegetable oil
- Kerosene
- Latex paint
- Other water-based fluids

The Technology:

The technology or structure behind each of the universal products helps determine relative strength and absorbency. This information along with the product's characteristics (grade, perforations, etc.) will help you decide which absorbent is best for your application.

Re-Form™
Eco-Friendly Absorbents

NEW!

Re-Form™ Pro Plus Absorbents

The absorbency and durability you expect (plus it's recycled)!

The look, feel and performance of a traditional absorbent made from 90 percent recycled fibers. Available in pads and rolls, Re-Form Pro Plus helps keep your employees and work environment safe from unexpected spills, leaks, drips and other accidents.

- Environmentally friendly: Made of 90% recycled materials
- Extremely absorbent: absorbs 20 times its weight
- Strong durability: 3-ply dimpled construction

Perforated design means you only use what you need and send less waste to landfills.

UNIVERSAL PADS & ROLLS

OIL ONLY

ABSORBS OIL AND REPELS WATER

Oil Only Absorbency

Specialized for oil and other petroleum-based spills, oil only pads and rolls repel water and will float indefinitely. These absorbents are unaffected by temperature and impervious to rot and mildew. Ideal for outside use, Brady SPC's oil only products are equally effective in soaking up petroleum-based solvents and paints, vegetable oils and other non-water soluble oil-based fluids.

Looking for added cost savings? Select a perforated option that allows you to use only what you need.

The Technology:

The technology (construction layers, weave and loft) behind each of the oil only products helps determine relative strength and absorbency. This information along with the product's characteristics (grade, perforations, etc.) will help you decide which absorbent is best for your application.

Common Liquids Absorbed:

- Drilling and cutting fluids
- Hydraulic and brake fluids
- Engine oils
- Transmission fluids
- Lubricants
- Gasoline, diesel and aircraft fuels
- Cooking oils
- Oil-based paints and solvents
- Other oils and petroleum-based fluids

Oil Only Absorbent Family:

All of these pads and rolls start with a highly absorbent polypropylene core - the difference is what happens from there. Features including durability, absorbency grades and coverstock give you versatile absorbent options for your specific application.

Oil Only Absorbency

SXT® Oil Absorbents

The ideal absorbent when durability, abrasion resistance and low linting is required.

- High performance, oil only absorbent made to handle petroleum-based spills
- Repels water and floats indefinitely; also remains intact even when saturated with oil
- 3-ply (MMM) Meltblown Polypropylene construction
- Spunbond coverstock provides added durability with very low linting
- Both abrasion resistant and non-abrasive performance – ideal for wiping down tools or component parts
- The extra strength required for the wringing and re-using of absorbents
- Dimpled for added durability and reduced linting
- Perforated to help you reduce waste - using only what you need

CHEMICAL

PADS & ROLLS COLOR-CODED FOR SAFETY

Chemical Absorbency

Alert your employees to the presence of hazardous fluids with green and yellow chemical absorbents from Brady SPC. These surfactant-treated polypropylene pads and rolls can be used on a wide range of chemicals and are chemically inert, so they will not react with aggressive fluids.

The Technology:

The technology or structure behind each of the chemical products helps determine the relative strength and absorbency. This information along with the product's characteristics (grade, perforations, etc.) will help you decide which absorbent is best for your application.

Common Liquids Absorbed:

- Acids and bases
- Aggressive chemicals
- Oils
- Solvents
- Citric acid
- Water-based fluids

Increase Safety and Save: Color Coded Waste Stream

Save on disposal costs by using different colored absorbents in specific parts of you facility and throughout your waste streams.

For example: a facility might use yellow absorbents in radioactive areas and green absorbents in their chlorine areas. Then the facility would use gray universal absorbents for the rest of their facility.

A color coded system benefits your employees' understanding of the waste stream because they will assume yellow absorbents are saturated with radioactive waste and green absorbents are saturated with chlorine.

High Visibility Safety & Chemical Mat

Get the benefits of a sign and an absorbent in one unique product.

- High visibility, safety mat for all-purpose fluid pick-up
- Extremely durable: 3ply SMM construction (spunbond coverstock 2 layers meltblown polypropylene)
- Color-coded for safety and easy separation of hazardous waste
- Product will not react with aggressive fluids

Recommended Applications

- For use where hazardous chemicals and acids are involved
- Nuclear power facilities
- Chemical spill response units
- Labs and hospitals
- Any industrial application utilizing aggressive fluids
- Applications with higher risk of slips, trips and falls
- Foot traffic areas or where extra durability is needed

Universal Plus Absorbents

Green color (the universal symbol for safety) indicates that it is intended for use on hazardous materials

- Absorbs any liquids including oil, hazardous chemicals and acids
- Dimpled for added durability and reduced linting
- 3-ply construction makes it stronger, more durable and reduces lint
- Perforated to help you reduce waste - using only what you need
- Chemically inert making it ideal for use with aggressive fluids

VENDSORB™ ABSORBENTS

VENDING FRIENDLY & PORTABLE ABSORBENTS

VENDSORB™ Absorbents

Brady SPC offers contractor grade absorbent rolls and 2-gallon spill kits that are ideal for vending programs. These products offer greater control and monitoring of product usage while creating a safe, productive work environment. Their small size makes them extremely portable and can be taken with you no matter where the spill occurs.

VENDSORB™ absorbents meet a wide range of applications, including absorbing universal, oil only and chemical spill.

The Technology

The technology behind each of the VENDSORB™ absorbent products helps determine the relative strength and absorbency. This information along with the product's characteristics will help you decide which absorbent is best for your application.

Recommended For:

- Reducing waste by controlling the flow of product to the point of use
- Small portable size for when you need to simply 'pickup-n-go'
- Clean-up oils, coolants, water-based fluids and hazardous fluids
- Deterring misuse and theft of product

SOCS, PILLOWS & DRUM COVERS

FOR ABSORBING LEAKS AND SPILLS AROUND MACHINES

SOCs, Pillows & Drum Covers

Specialty absorbent products including SOC, pillows and drum covers can be used around a facility when a pad or roll may not be sufficient. These flexible absorbents allow you to place the absorbent exactly where you need it.

Absorbent SOC are dependable, flexible tubes that contain and absorb liquids. SOC mold around corners and conform to uneven surfaces to soak up spills and drips, preventing fluid from escaping to other areas.

Absorbent pillows are ideal for use under spill pallets or machines that are known to drip or leak. Pillows are easy to retrieve, and can soak up oil and water-based fluids in hard-to-reach areas including sumps, catch basins and outdoor ponds.

Absorbent drum covers eliminate the messy drips and overflow when mixing or pumping liquids from the drum barrel. Brady SPC drum covers keep drums, the floor and surrounding storage areas dry and clean.

Recommended for:

- Wrap a SOC around your machine to stop leaks from reaching the floor
- Place a pillow in a tight space between machines to catch splashes or overspray
- Keep drum storage areas clean and dry with pre-cut drum covers

Universal Absorbency

Use these all-purpose absorbents to clean-up oils, coolants, solvents and water-based fluids throughout your facility. Their gray color masks spills and stains – helping you resist the urge to pick up the absorbent before it is fully saturated.

Re-Form™ Universal SOC's are up to 50% more absorbent than polypropylene SOC's meaning you can soak up more with less.

Oil Only Absorbency

Specialized for oil and other petroleum-based spills, Oil Only SOC, pillows and drum covers will not absorb water making them ideal for outdoor use.

These absorbents are unaffected by temperature and impervious to rot and mildew. Ideal for soaking up petroleum-based solvents and paints, vegetable oils and other non-water soluble oil based fluids.

Oil Only SOC

- Oil only polypropylene SOC absorbs oil and petroleum based liquids while repelling water
- Wringable and can be incinerated
- Strong wicking action: adsorption begins instantly after contact with the spilled liquid, no need to turn the SOC

? SOC Usage Tips:

Use these tips to help ensure that you get the most out of your SOC:

- Clean-up all loose materials, rags and other debris around the spill
- SOC's work best when they lay flat against the floor
- Replace your SOC when liquid begins pooling or seeping underneath
- When installing your SOC, shake vigorously to evenly distribute absorbent within the SOC
- Overlap the ends of your SOC approximately 5" to extend your spill protection

MATS & RUGS

CLEAN, DRY FLOORS PREVENT SLIPS, TRIPS & FALLS

High Performance Mats and Rugs

Brady SPC absorbent mats and rugs keep aisles and walkways slip-free by absorbing and containing oils, liquids or other spills. They are designed to hold up under the toughest conditions and are ideal for high traffic areas and workstations. Compared to an entrance mat, absorbent mats and rugs offer better traction and reduce the tracking of liquids from one area to another.

The Technology:

Brady SPC absorbent mats and rugs are constructed from durable, needle-punched, polypropylene fibers - a more durable material with a larger fiber diameter than meltblown fibers. This technology means that fibers or absorbent materials will not come loose around high traffic areas or workstations.

Common Liquids Absorbed:

- Bases
- Oils
- Chemicals
- Solvents
- Water-based fluids

MARINE

HIGH ABSORBENCY ON THE WATER

Marine Absorbents

Brady SPC marine absorbents are specially designed to float on water and contain or absorb a wide variety of marine fuels and oils. From containment to booming and skimming operations, these absorbents will soak up unwanted fluids on lakes, rivers, streams and coastal shorelines. Marine absorbent products are made for high absorbency and rapid deployment in demanding emergency situations.

The Technology:

Brady SPC absorbent booms are constructed of highly absorbent polypropylene fibers encased in a durable skin that is lined with a heavy duty tow rope. The booms are fastened with three stainless steel connectors to allow for linkage and aid in fast retrieval. This is extremely important when towing heavy booms are saturated with oil.

Recommended For:

- Marinas
- On Boats & ships
- Loading docks
- Affluent pipes
- Outdoor liquid transfer points
- Fuel storage tanks

GRANULAR & NEUTRALIZERS

LOOSE, MULTI-PURPOSE ABSORBENTS

Granular & Neutralizer Absorbents

Granular absorbents are loose, multi-purpose absorbents that are ideal for liquid spill clean-up, lab packing and stabilization of free liquids. These absorbents are ideal for facilities that prefer or require the use of traditional granular absorbents.

Neutralizing polymers provide safe spill control for most acids, including battery spills. Color change indicates when neutralization has taken place.

The Technology:

The small, loose particles of a granular absorbent make it ideal for applications where a pad or roll would not offer a proper fit. Liquids don't always spill on a smooth surface, and when they do, a granular absorbent can absorb liquids from the cracks and crevices of a variety of surfaces.

Recommended For:

- Absorbing oils, solvents, lubricants, coolant and water on uneven surfaces including on roads or parking lots
- Acid or base spills requiring neutralization prior to spill cleanup

SPILL CONTROL & CONTAINMENT

KEEPING YOU SAFE FROM UNEXPECTED SPILLS OR LEAKS.

Spill Containment

A proper spill containment plan can help create a safe and productive work environment for your employees. Brady SPC spill containment products help to prepare and protect any facility with solutions for unexpected accidents. Absorbent storage centers and spill kits provide fast-response solutions for unplanned spills of oils, solvents, coolants and other fluids. Brady SPC drains, spill decks, berms, pans and pallets also ensure facility safety by catching, controlling and containing unexpected leaks, drips and spills.

Common Liquids Absorbed:

- Accidental or unexpected spills
- Indoor and outdoor drain applications
- Drain pans for dripping valves or facets
- Storing absorbent products at the point of need

Spill Control & Containment

Spill Containment

SPC spill containment products are designed with your efficiency in mind - keeping your employees and work environment safe from unexpected drum spills or leaks.

Spill Containment decks and pallets feature:

- **Solid Construction:** Injection molding ensures exceptional durability and consistent specifications
- **Standard Lip and Grate Heights:** Manufactured to standard heights to allow uninhibited movement
- **Nestable:** Remove the grates and stack for storage
- **Grate Pins:** Pins keep the grates in place during use and prevent the walls from bulging

Interchangeable Grates with Large Openings:

Removable grates can be used with spill decks or spill pallets (even between two and four drum pallets)

- **Forklift Friendly:** Easily use your forklift to re-locate your decks or pallets and drums

Spill Decks

- Low profile, 21.2 gallon capacity, 2-drum spill decks
- Contain hazardous leaks in your drum storage and dispensing areas
- Built-in clips easily connect multiple decks – creating a 4, 6, 8 or more drum storage platform

Spill Containment and Storage

A proper spill containment plan can help create a safe and productive work environment for your employees. SPC spill containment products help to prepare and protect any facility with solutions for unexpected, critical accidents. Absorbent storage centers and SPC spill kits provide fast-response solutions for unplanned spills of oils, solvents, coolants and other fluids. SPC drains, spill decks, berms, pans and pallets also ensure facility safety by catching, controlling and containing unexpected leaks, drips and spills.

This absorbent center's modular cabinet is designed to hold all of your essential absorbents for storage and easy access so your spill response team can quickly grab the right absorbent for the job. With the ability to hold full cases of SPC absorbent products, there is no special refill required for restocking. Also, because it's modular, customizable and mobile, the size of your absorbent storage is entirely up to you.

Spill Control & Containment

Spill Kits

A range of emergency response kits to handle any type of spill.

Accidents happen, so it's better to be prepared. Brady SPC offers a complete selection of spill kits in a variety of types and sizes to equip you with everything you need to clean-up accidents when they happen. Quickly and easily clean-up spills of oils, solvents, coolants and other fluids. They are ideal for fast response to critical accidents.

Many of our kits are available in the following types:

- **Universal/Maintenance Kits**
For oil, water-based and chemical liquids
- **Oil Only Spill Kits**
For oil and petroleum-based liquids
- **Mixed Oil Only and Universal Spill Kits**
For indoor and outdoor applications. Kit contains both all-purpose universal absorbents and water-repellent oil only absorbents for petroleum and oil-based liquids
- **Chemical Spill Kits**
For aggressive and hazardous liquids
- **Re-Form™ Spill Kits**
Universal absorbents that are eco-friendly
- **TAA Compliant Spill Kits**
Complies with the Trade Agreements Act

Spill Kits Increase Efficiency

Worker productivity and efficiencies can be improved dramatically by strategically placing spill kits or absorbent storage centers around the facility, closer to the areas of need. For both emergency response and routine maintenance and safety, employees should not be wandering away from their workstation to the other side of the plant or tool room to find the absorbent materials they need.

Trade Agreement (TAA) Compliant Kits

GSA Schedule Contracts are subject to the Trade Agreements Act (TAA), meaning all products listed on the GSA Schedule Contract must be manufactured or “substantially transformed” in a “designated country.” The designated countries are comprised of:

- World Trade Organization government procurement agreement countries
- Free trade agreement countries
- Least developed countries
- Caribbean basin countries

Spill Procedure Guide: What To Do When A Spill Occurs

When a spill occurs, time is of the essence to make sure a quick and safe clean-up occurs. Here are some helpful hints to make sure you, your employees and the environment are protected.

1. Risk Assessment

Evaluate the type of material spilled and identify the source. If you are NOT familiar with the liquid and its chemical properties, vacate the area and contact proper authorities.

2. Protective Clothing

Wear the appropriate protective gear for the situation. If the source or the material is not identifiable, assume the worst.

3. Containment

Contain the liquid and seal drains.

4. Stop the Source

Close valves, rotate punctured drums and plug leaks where it is possible and safe to do so.

5. Begin Clean Up

Use Brady SPC absorbents to absorb spilled liquids.

6. Contact Authorities

Report the spill to proper legal authorities in your community. Be sure to fill out all necessary reports in accordance with local laws.

7. Disposal of Used Material

Absorbent materials take on the characteristics of whatever they absorb. Be sure to dispose of used absorbents and spilled liquids in accordance with local laws.

8. Decontaminate

Clean all tools and reusable materials properly before reuse.

9. Restock Materials

Replace absorbent materials and safety equipment used in any clean-up operation.

10. Review Contingency Plans and Procedures!

PLEASE NOTE: THE SPC SPILL KIT IS A STOP-GAP MEASURE FOR MINOR SPILL CLEAN-UP. IF A SERIOUS SPILL OCCURS, CONTACT LOCAL AUTHORITIES FOR DIRECTION AND ASSISTANCE FOR THE PROBLEM. DUE TO THE POSSIBLE TOXIC AND HAZARDOUS FLUID ABSORBED, BRADY DOES NOT RECOMMEND DISPOSAL PROCEDURES.

In an effort to reduce shipping costs for our customers, pallet quantities may vary.

DISCLAIMER: The above properties are "nominal" values used for PROCESS CONTROL when the product is produced and/or inspected. Performance "nominals" may vary depending upon the specific application, and/or the environment being applied, stored, or shipped. The "Absorbency" Spec and "SPCTM004" test method is based on the protocol of ASTM F726, using SAE20 non-detergent as the Oil Type, medium viscosity.

DISCLAIMER: The above properties are "nominal" values used for PROCESS CONTROL when the product is produced and/or inspected. Performance "nominals" may vary depending upon the specific application, and/or the environment being applied, stored, or shipped. The "Absorbency" Spec and "SPCTM004" test method is based on the protocol of ASTM F726, using SAE20 non-detergent as the Oil Type, medium viscosity.
