

NEW

Iconic "polka-dot" pattern self-cleans while sharpening.

Superior diamond quality and coverage.

Compact folding design for easy stow-and-go.

No lubrication needed. (Use water only if desired.)

NEW see-through handles of tough engineered resin provide easy identification of tool type.

The New Generation of Diafold® Sharpeners

Our latest improvement to the Diafold® product line may appear small, but it delivers big on benefits. The new CLEAR resin handles offer not just a great new look; they make the sharpener visible to the consumer even while the product is closed. That makes the tool type identifiable at all times. Better still, it means the Diafold® can now be displayed in its folded position, allowing for smaller, lighter, and more eco-friendly packaging. Beyond that you get same great performance you've come to expect from DMT® and the same choice of diamond surfaces: our signature *interrupted diamond surface* for clean, continuous edge contact while sharpening; and our *continuous diamond surface* for use in tight spaces and on small pointed tools.

FEATURES

- 6 Tool Types (see back panel for details)
- CLEAR handles manufactured from tough engineered resin
- Lightweight eco-friendly packaging materials made with 93% less plastic
- Tamper-resistant packaging for security that's easier to open after purchase
- No change to UPC and Bar Codes

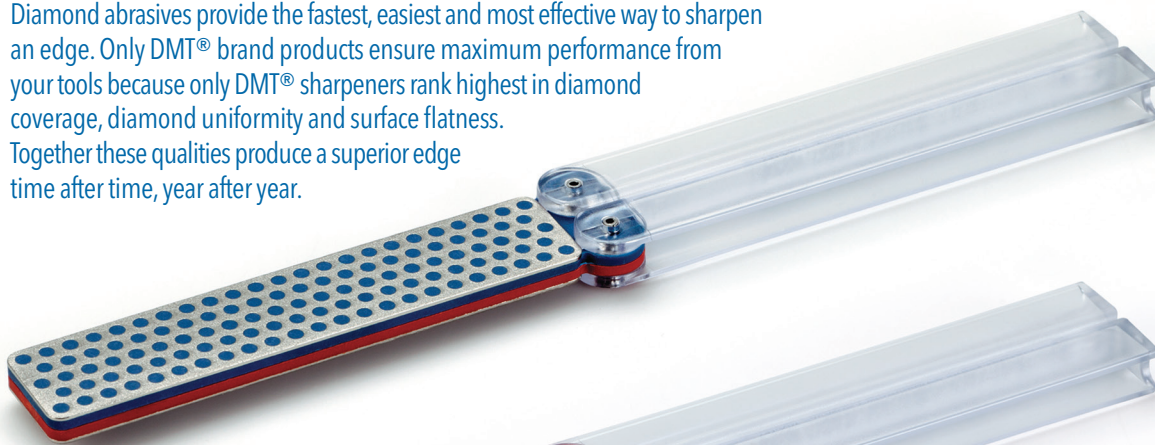

NEW Packaging

- Eco-friendly materials
- 93% less plastic
- Lighter weight
- Tamper resistant
- Easier to open after purchase

Diamond abrasives provide the fastest, easiest and most effective way to sharpen an edge. Only DMT® brand products ensure maximum performance from your tools because only DMT® sharpeners rank highest in diamond coverage, diamond uniformity and surface flatness. Together these qualities produce a superior edge time after time, year after year.
