

## CONTROLLERS, SWITCHES AND SENSORS FOR PUMPS

### FACT sheet

#### DAYTON DELUXE CONTROLLER AND DUAL FLOAT

The Dayton Deluxe Controller monitors pump and power conditions, sounds an alarm when problems are detected, activates pump weekly to excersize and extend pump life, allows fo an adjustable pump run time, and includes export terminals for connecting to home security system, remote dialer or other device. The Deluxe Dual Float has two micro reed activated floats for added reliability and a protective cage to prevent debris from interfering with the floats. The Dayton Deluxe Controller and Dual Float can be used with almost any sump pump.
