

# GRIP-X™

**GRIP-X™ All-Traction™ Footwear** is designed to increase traction in outdoor winter environments. GRIP-X™ is a lightweight, compact traction device that fits over all types of work shoes and boots. The various patented features of GRIP-X™ that make it easy to use and extremely effective have made GRIP-X™ one of our most popular winter products.

MODEL: JD3500

1-888-NO-SLIPS

Not only was the aggressive traction of **GRIP-X™** exactly what we were looking for, but the durability blew me away. With other products like this, the spikes would fall out and the rubber would tear — making them worthless. But **GRIP-X™** held up like a champ. It's the perfect product for industrial use.

## DISTINCTIVE FEATURES

### Patented Dual Pull-Tab System

GRIP-X™ features a unique, patented dual rear pull-tab system that you won't see on any other walking device. The dual pull-tabs can be grabbed with both hands and used to elongate and widen the device for unbelievable ease of on and off. This design overcomes the ineffectiveness of the antiquated single pull-tab and single-loop systems.

### Thick Treaded Sole

GRIP-X™ features an aggressive tread that enhances the overall traction on every step, no matter what the surface.

### Patented Dual-Density Design

To achieve maximum stretch while maintaining durability in the upper portion of GRIP-X™, the upper is molded to a precise thickness. This thickness increases substantially on the sole portion of GRIP-X™ in order to increase durability and help to prevent the spikes from inadvertently falling out.

### Full Heel Cup and Critical Heel-Strike Spike

Because the first part of your foot that contacts the walking surface is the back of the heel, GRIP-X™ features a critical heel-strike spike, ensuring traction on first contact. This spike starts the process of preventing slips and falls before other products have hit the ground. GRIP-X™ also features a full heel cup ensuring greater balance and stability with each step.

### Patented Spike Clip

GRIP-X™ features a patented two-piece spike clip system. The two-piece system allows the spike clip to be firmly clamped together and locked into place, as opposed to merely "pushed through".

## SIZE CHART

MODEL	FITS MEN'S	FITS WOMEN'S
JD3500-XS	3 - 4 ½	5 - 6 ½
