

Indicator[®]

A Single-Bin Kanban Solution

What is your Inventory Management System Costing You?

Organizations are constantly looking for a better way to manage inventory control, but many systems can be complex or expensive.

Are you having these problems?

- ✗ Workers using different ways to notify supervisors about stock outages – including leaving bins on supervisors' desks, or turning bins upside down!
 - ✗ Employees don't know what to do when stock is low or runs out.
 - ✗ Inspecting EVERY bin to check for low inventory.
 - ✗ Homemade Kanban flags that fall off or don't work.
 - ✗ 2-Bin Kanban systems wasting too much space.
-

These problems lead to stockouts and interrupted workflow, which affect your productivity and bottom line!

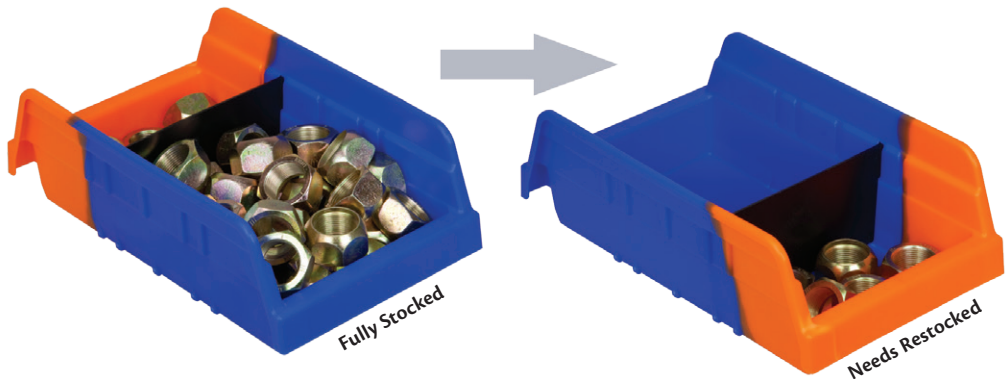

Can you tell which bins need replenished?

Indicator Bin is the Answer!

With Akro-Mils' patented Indicator® Bins you'll see when stock is low immediately! The Indicator Bin is the industry's first single-bin Kanban system.

- ✓ The bright orange trigger side of the bin indicates that stock is low – inventory control at a glance!
- ✓ Bins stay in place so empty bins won't pile up.
- ✓ The orange reserve stock area provides enough inventory until parts can be reordered or restocked.
- ✓ The Indicator Bin prevents stockouts and improves productivity – saving you time and money – and improving employee morale.

Now can you tell which bins need replenished?

Visual Inventory Management Solutions

Part of Akro-Mils' BinTelligence® Series, Indicator® Bins are an ideal tool for implementing and maintaining an effective Kanban system.

Indicator Bins Offer:

- ✓ A defined process that is easily adopted.
- ✓ A complete Kanban system captured in a single bin.
- ✓ Reduced inventory/holding costs by providing visual recognition of low stock.
- ✓ A low-cost solution for inventory control.

With Indicator Bins:

- ✓ Workers can let supervisors know that supplies are low without stopping work or running out of inventory.
- ✓ Dividers can be adjusted to accommodate the proper amount of reserve inventory.

Here's How It Works: Stock, Pick, Flip and Replenish

STOCK both sides of the bin.

PICK from the blue side until you reach the divider.

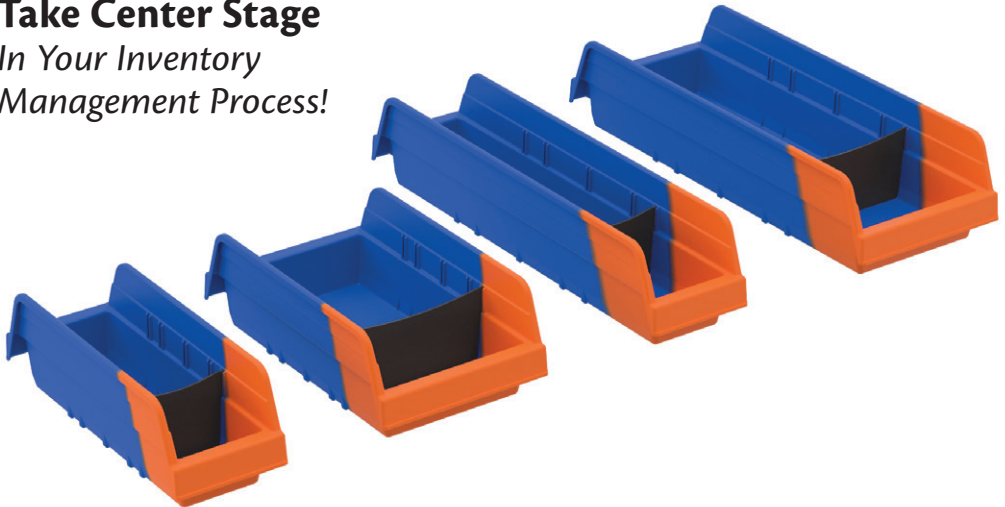

FLIP to the orange to show low inventory.

REPLENISH the bin and repeat!
