MEASURING WHEELS

RRT6 / RRT12

NEW Sealed Housing
Better Gearing

FEATURES

- Enhanced pistol grip handle increases control and comfort.
- Reset on the handle AND on the unit housing — no more bending over, lifting the wheel or stepping on it to reset to zero. Additionally, the reset on the housing is reinforced to protect it when resetting the counter with your foot.

Pistol grip handle and center line balance

Folds down to half its size

- Brake on pistol grip — stops counting instantly. Putting the brake on exactly when you need it prevents the wheel counter from moving.
- Collapsing hinge — snaps into extended lock with the flick of the wrist and it disconnects if you forget to press the unlock trigger.
- Center-line handle design with counter on top of wheel — center of gravity aligned for balance. This makes measuring easier and more accurate. The raised counter makes reading it easier.
- Compact fold-down — easily reduces to half its size for storage and portability. Storage is a snap.
- Flip-down kickstand (**3 foot size**) — keeps the wheel upright when you need your hands free to perform other tasks and stays out of the way as you measure.
- Gear and shaft transmission is gear-driven for highest measurement accuracy and strength. No belts to stretch or fail.
- Handle lock — lock your handle in place when you're not using the wheel. Our clamp protects the extension hinge from breaking.

EASY-TO-READ COUNTER

5-digit, easy-to-read magnified counter measures 9,999 feet, 11 inches—that's almost two miles!

2-year limited warranty.

MODEL	UPC (052837)	UNITS	DIA.	CIRC.	SPECIAL FEATURES
