MEASURING WHEELS

ROADRUNNER INDOOR/SHORT RUN DUAL WHEELS

Smaller, 1-foot wheels combine Keson quality and reliability with convenient size and light weight. Typically used in short-run and indoor applications, these wheels are ideal for measuring curved, horizontal, and asymmetrical surfaces.

EASY-TO-READ MAGNIFIED COUNTER

Features a 5-digit, easy-to-read, magnified counter that measures 9,999 feet, 11 inches without resetting—That’s almost two miles!

DUAL WHEEL

Keson has patented a raised reset button that enables you to re-set the counter with your foot. We have improved the supporting structure around the reset so that it can handle foot taps to zero the counter.

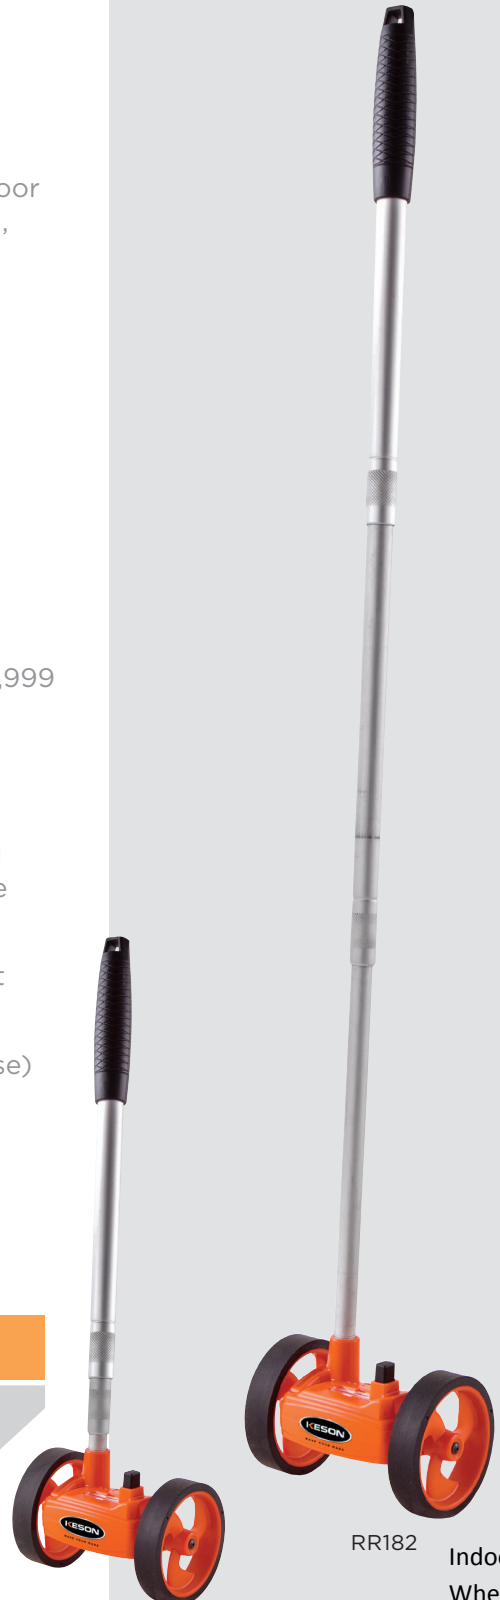

The dual wheel provides greater stability when measuring, making it easier to maintain a straight line as you walk.

The handle telescopes from 20 inches (fits into a toolbox or briefcase) up to 42 inches.

Limited lifetime warranty.
