

# Step Beam Decking with Inverted Channels

## Pre-Galvanized Finish

Photos shown have painted finish

### PRODUCT SHEET

**Ready Deck™** wire decking offers a broad array of stock and quick ship sizes along with limitless custom options. Our deck is strong, safe and reliable and simply drops into place for easy installation. **Ready Deck™** increases fire safety by improving performance of your sprinkler system. The Inverted Channels are used in a clean room environment and/or food applications as they keep debris and dirt from collecting inside the U-Channels making these a more sanitary option. The Pre-Galvanized decking is fabricated from hot-dipped galvanized wire and coil steel, making it tough and durable and comparable in cost to powder coating. Our **Ready Deck™** Stock Line will accommodate most standard step beams found in the industry today.

#### Inverted U-Channel for 1-1/2" – 1-5/8" Step Beams
