Polar Tech
INDUSTRIES, INC.
TEMPERATURE SAFE SHIPPING &
PROTECTIVE PACKAGING PRODUCTS

Last year, we promised that we would continue to think about, and only about, the box. We kept that promise. We thought, thought, and thought some more. And, when we were done thinking, we started investing. The results of our thinking and investing are reflected in this Catalog. We are proud to present hundreds of new products. All of our products, new and old, make it easy for you to protect the most valuable shipment in the World; yours.

While Polar Tech has been busy innovating and expanding, others have either struggled to survive or closed their doors. In these uncertain economic times, purchasers would be well-advised to live by the Latin adage "caveat emptor." Beware of those who resort to pseudo-science to market their products. Beware of those who are contracting for they may shrink themselves right out of business. Beware of those who offer the illusion of value. These caveats are not exhaustive. You can develop, or have developed, your own list.

You do not need to assume any risk. If you want the best, leave the rest and come to us. Since 1984, Polar Tech has offered quality packaging and shipping solutions. Now, Polar Tech offers an expanded and truly amazing array of products. Polar Tech is confident that you will find the product you need in this Catalog. If you do not find exactly what you need, contact us and we will guide you to an appropriate product or help you develop a custom solution.

Polar Tech is not done thinking and investing. Our commitment to providing our customers innovative products, unmatched product quality, and superior customer service, will not let us rest. We have already taken additional steps to ensure that Polar Tech will thrive, not just survive. As they say in the news biz, stay tuned.

Join Us and Recycle

Polar Tech was "Green" long before being "Green" was in vogue. All of Polar Tech's refrigerant and EPS products are and always have been, manufactured from inert materials that do not contain any harmful chemicals or emit any harmful gases. The gel in Polar Tech's refrigerant products is non-toxic and is entirely water soluble. All of Polar Tech's EPS products can be recycled. The fact is: Polar Tech's EPS products are friendlier to the environment than paperboard equivalents. EPS packaging products, compared to paperboard equivalents, generate 46% less atmospheric waste and 42% less waterborne waste. In addition, EPS products are produced with 30% less energy. So, if you are committed to being "Green," you will find a "Green" partner in Polar Tech.

MORE NEW SIZES

DRY ICE INSULATED CONTAINERS

- Dry ice, wet ice or refrigerant storage
- Transfer ice from source to work areas
- Transport low temp items from lab to lab
- On site collection carriers
- Dry ice delivery and storage systems
- Insulated pads hold content temperatures while in use

Foam insulated storage chests are lightweight, molded EPS foam containers with tight fitting lids. Comes assembled in a sturdy lb. white corrugated box. Heavy-duty dolly available for some models.

DRY ICE HANDLING ACCESSORIES

INSULATED DRY ICE COVERS

These insulated dry ice pads allow container and content to maintain temperatures during frequent use. Flexible insulated pad allow easy use of container and maintaining temperatures of contents during use, without excessive sublimation.

Insulated dry ice pads come with industrial grade woven poly polypropylene handles and 2" x 2" clear pocket.

Strap # 1203 also fits J50 foam or foam with box.

TRANSPORT/STORAGE CHESTS

THERMO CHILL® DURABLE “INDESTRUCTIBLE” TRANSPORT

Thermo Chill® indestructible transporters maintain critical temperatures for your perishable materials. These durable transports are tough, double walled and built to last. Made using special melt-blend, high impact plastic, that is filled with polyurethane foam. Each container resists cold impacts and provides longer cold retention. Unlike other products, these transporters do not contain any fiberglass insulation and are, therefore, preferred by laboratories.

All sizes and styles have superior insulation for lowest sublimation rates. The tight fitting lids and durable construction maintain temperatures across a wide range of ambient temperatures. These containers have a square interior for maximum space utilization and a smooth interior that is easy to clean.

PART #	INSIDE DIMENSIONS L x W x D	OUTSIDE DIMENSIONS L x W x D	CUBIC FEET	WEIGHT
TC02	21" x 11" x 14"	30" x 21" x 24"	2	45 lbs.

TC11*	33" x 20" x 27"	42" x 28" x 40"	11	130 lbs.
TC30	42" x 36" x 32"	49" x 43" x 43"	30	220 lbs.

* Caster Wheel Model.

INSULATED DRY ICE PADS AVAILABLE, SEE PAGE 3 FOR MORE INFORMATION.

Caster wheel models are convenient for safely transporting medium or tall larger pay loads in narrow corridors, aisles and tight working areas. Use as a dry ice, wet ice or cold pack storage transport.

- Convenient for dispensing dry ice or wet ice
- Ideal for dispensing dry ice or cold packs in a shipping and packing department
- Perfect for shipping or movement of biological materials, specimens, vaccines, hazardous materials or any perishable products
- Durable
- Ergonomically designed

TRANSPORT/STORAGE CHESTS

SAFELY TRANSPORT FROZEN AND REFRIGERATED PHARMACEUTICALS

Thermo Chill's upright chests assure that pharmaceuticals, biological and perishable products are safely transported at subzero, frozen or refrigerated temperatures.

Leakproof ICE-BRIX®

ICE-BRIX® contains a specially formulated leakproof, long lasting, viscous gel refrigerant made with non-toxic ingredients listed as FDA GRAS. Rated **"Best in all aspects"**.

ICE-BRIX® is the ultimate in refrigerant packs. Features include:

- Leakproof
- Variety of sizes
- Reusable
- Economical
- Custom imprinting

ICE-BRIX® poly bags are sealed in a heavy duty plastic pouch and keep perishable products at a constant and desirable temperature.

BLACK ICE™ COLD PACK

BLACK ICE™ FOIL PACK

THE REFRIGERATOR IN A BAG!

RE-FREEZ-R-BRIX® is a block of rigid foam that holds its shape frozen or thawed and is reusable. These refrigerants are non-toxic, sealed in a heavy plastic pouch, and are rated the best in foam refrigerants. Other products just don't compare.

- Prevents thawing... Keeps frozen products chilled for an extended period of time.
- Protects against freezing... When packaged in properly insulated containers, warmed RE-FREEZ-R-BRIX® release heat, keeping perishables from freezing.
- Protects from warming... Keeps perishables requiring a temperature range of 32°F to 60°F at a safe, uniform cool temperature for over 14 days.

COLD BRICKS

CURTAIN OF COLD®

SADDLE BAGS

SADDLE BAGS AND COLD POCKETS

Fully wrap and protect your perishables with a "curtain of cold®". Unless you completely cover your product, the only thing keeping your product cold... is the product itself.

- Ultimate in temperature uniform stability
- Refrigerant Saddle Bags control the entire stability process
- Maximum temperature sensitive protection for bulk shipping of refrigerated or frozen products even under extreme ambient conditions for up to 6 days.
- Reusable
- Recyclable

ICE-BRIX® SADDLE BAG PALLET REFRIGERANTS

PART #	DESCRIPTION
SB24	12" x 144" 18 continuous packs, full length cold wrap or cut to desired length
SB10	8" x 34" 8 packs per length, in container cold wrap

COLD POCKETS™

COLD POCKETS™ CREATE YOUR OWN CURTAIN OF COLD® WRAP, INSERT EITHER COLD PACKS, DRY ICE SLABS OR BOTH

PART #	DESCRIPTION
CP12	12" wide x 144" long 15 pockets per length

(Minimum 4 full wraps) 7 wraps will provide a full curtain of cold coverage for a pallet or bulk transport shipper. You can cut them to a length of your choice to surround your product and keep the cold in place during shipping. Use pallet rubber band part # 1301, 1401 or 1501 to hold the refrigerant against the product during shipping.

How to choose an insulated container and properly package your product effectively.

There are many variables to be considered when choosing a container and refrigerant that will protect your product from the elements, and shipping mishaps.

The three most important factors are insulation, refrigeration and protective packaging. More than just providing thermal protection you must also provide protection for the handling your package receives during shipment.

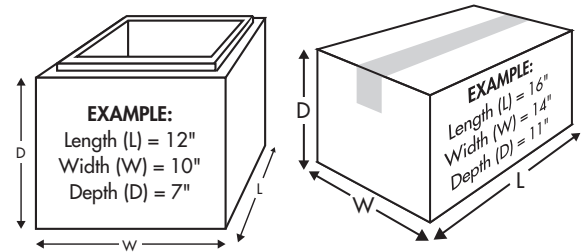

Refrigerants are the most important component of the perishable product package. Refrigerants control and stabilize temperature. The general recommendation is to place refrigerants across the top and all four sides (or at least two sides). *Refrigerants are the lowest cost component of the package and the most important component for maintaining temperature.*

CONTAINER THICKNESS

- ¾" – 1" EPS foam molded insulated containers are recommended for **Overnite™ – 2 day shippers.**
- 1½" – 2" thick EPS foam molded insulated containers are recommended for **1 – 5 days transit.**
- 2" – 3" thick EPS foam insulated containers are recommended for **2 – 8 or more days in transit.**

CHOOSING AND PACKAGING THE INSULATED CONTAINER

1. Arrange the product to be packaged, measure the dimensions (length x width x depth).
2. Add 1½" to the depth dimension for top refrigerant placement across top. Add 3" to width dimensions and 3" to the length dimensions for a 1½" space on either side of length and width to totally surround the perishable product with refrigerant.
3. Place the perishable products and refrigerants into the insulated container. Surround the product with refrigerant, for best results.
4. Fill all void areas (empty space) of the container with dunnage or a solid type packing material. This maximizes the insulating performance, and prevents products from shifting.
5. Close the insulated container, label and ship.

POLAR EXPRESS™ 2-3 DAY 1" INSULATED CONTAINERS

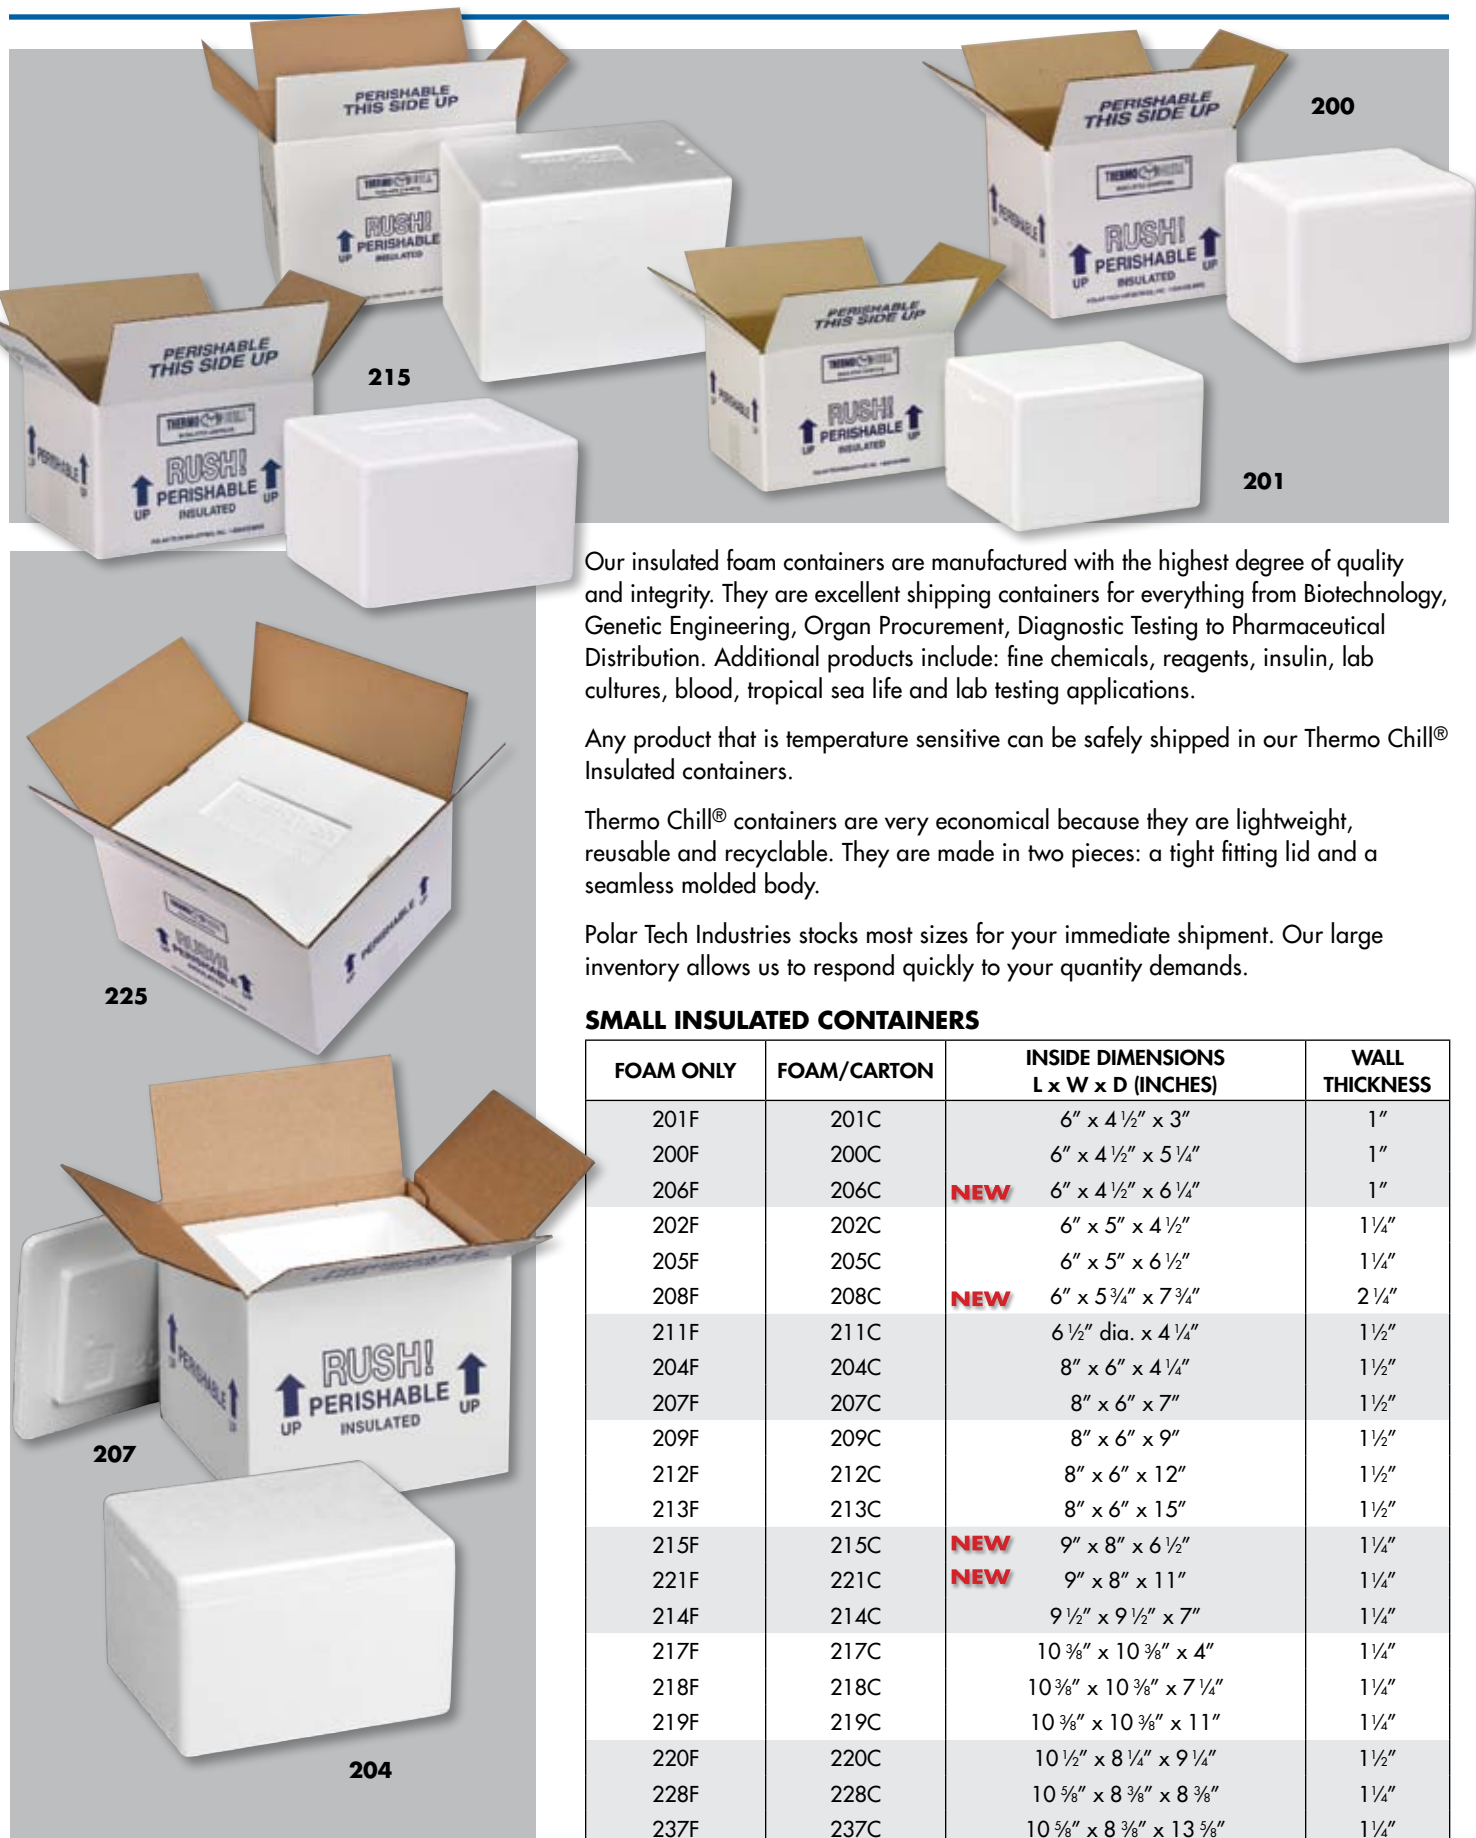

Perfect fit between our standard "Thermo Chill®" and "Overnite™" series containers. Structural 1" EPS foam is more rigid than ¾" ON series. The 2-Day Polar Express™ insulated containers are durable for 2-3 day transit.

POLAR EXPRESS™ 2-3 DAY INSULATED CONTAINERS

INSULATED FOAM SHIPPERS (1-5 DAYS)

Our insulated foam containers are manufactured with the highest degree of quality and integrity. They are excellent shipping containers for everything from Biotechnology, Genetic Engineering, Organ Procurement, Diagnostic Testing to Pharmaceutical Distribution. Additional products include: fine chemicals, reagents, insulin, lab cultures, blood, tropical sea life and lab testing applications.

Any product that is temperature sensitive can be safely shipped in our Thermo Chill® Insulated containers.

Thermo Chill® containers are very economical because they are lightweight, reusable and recyclable. They are made in two pieces: a tight fitting lid and a seamless molded body.

Polar Tech Industries stocks most sizes for your immediate shipment. Our large inventory allows us to respond quickly to your quantity demands.

CONVENIENT LAB SAMPLER MAILER KITS

The design of our chest and lid simplify packing and unloading.

- Insulated mailers with white box and cold packs in a convenient starter kit.
- Safely accommodates small bottles, samples or mail order shipments.
- Light weight, durable, excellent insulating properties.
- Reusable and recyclable.

COMPACT MAILER/ICE-BRIX® CONVENIENT PACKS

Kit order # 201KIT Convenient Pack – Includes
24 Item # 201C Compact mailers and (6" x 4 1/2" x 3" ID)
36 Item # IB8 ICE-BRIX® cold pack

COMPACT MAILER TEMP-CONTROL, 4 SPECIMEN TUBE/ICE-BRIX® CONVENIENT PACKS

Kit order # 201VIC Convenient Pack – Includes
24 Item # 201C Compact mailers and (6" x 4 1/2" x 3" ID)
with an assembled 4 cavity specimen tube insert,
holds 4 (3 – 10 mil) tubes
36 Item # IB8 ICE-BRIX® cold pack

TALL COMPACT MAILER/ICE-BRIX® CONVENIENT PACKS

(2" more packing space)

Kit order # 200KIT Convenient Pack – Includes
18 Item # 200C Tall Compact mailers (6" x 4 1/4" x 5" ID)
36 Item # IB8 ICE-BRIX® cold pack

211C BIO MAILER/ICE-BRIX® CONVENIENT PACKS

Kit order # 211KIT Convenient Pack – Includes
12 Item # 211C Insulated mailers (6 1/2" Dia. x 4" ID)
36 Item # IB8 ICE-BRIX® cold pack

204C INSULATED SHIPPER/ICE-BRIX® CONVENIENT PACKS

Kit order # 204KIT Convenient Pack – Includes
10 Item # 204C Insulated shippers (8" x 6" x 4" ID)
12 Item # IB12 ICE-BRIX® cold pack

207C INSULATED SHIPPERS/ICE-BRIX® CONVENIENT PACKS

Kit order # 207KIT Convenient Pack – Includes
6 Item # 207C Insulated shippers (8" x 6" x 7" ID)
12 Item # IB12 ICE-BRIX® cold pack

For more information on refrigerant cold packs – see pages 9-11.

OVERNITE™ SHIPPERS AND MAILERS

THERMO CHILL® OVERNITE™ (1-2 DAY)

Thermo Chill® Overnight™ Shippers and Mailers are engineered especially for the 1-2 day shipper. They are lightweight, dependable and very cost-effective.

We manufacture a complete line of the highest quality, multi-use insulated containers for overnight or two-day shipments. These lightweight yet sturdy shippers are an inexpensive solution for shipping temperature-sensitive products via UPS, FedEx, Airfreight, Parcel Postal or other services.

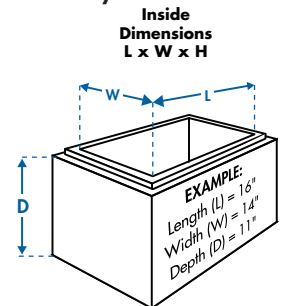

For extended shipping times, make use of our ICE-BRIX® leakproof, and odorless gel refrigerant packs (see pages 7 and 8).

Our specially formulated packs are proven to be the best solution for long lasting, low temperature consistency during shipments.

- Priority shipments
- Lightweight
- Economical
- Multiple sizes
- Corrugated box
- All sizes in stock
- Immediate delivery

Carriers may require overnight containers to be shipped in a corrugated box.

We are your one stop source for all your temperature packaging requirements. The leader in stock selection for your most effective, consistent, custom shipping solutions, including immediate service.

INSULATED MULTI-DEPTH SHIPPERS

The perfect container for shipping everything from small, medium and large order fulfillment with minimal effort

The Expand-em™ Series is designed to meet a full range of shipping needs. The distinctive “common” top and bottom style with easy-locking seal create multiple possible shippers from only two pieces.

The Expand-em™ Series provides an affordable alternative for customers with storage restrictions as well as variable height sizing requirements. Simply add a lid to a base or a lid to a base or a base to a base. Always allow room for your refrigerant packs or dry ice to help ensure your perishable product’s integrity upon arrival.

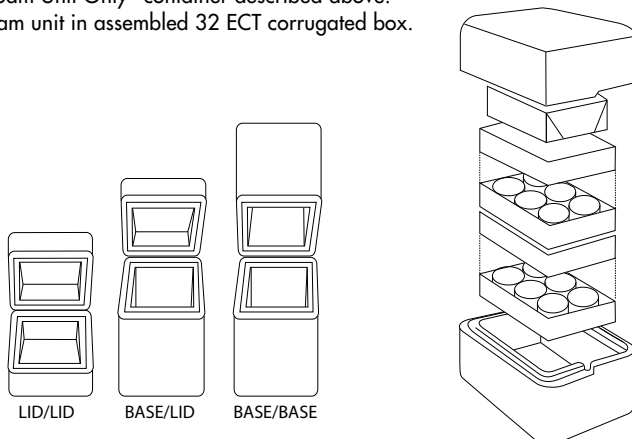

Most carriers require the insulated shippers to be in an outer corrugated box. Our professional representatives can assist you further with any questions.

EXPAND-EM™ FOAM SHIPPERS

THERMO CHILL® ROUND BASE/SQUARE LID

EXPAND-EM™ SERIES 8 1/8" ROUND DIAMETER INTERIOR AND SQUARE INTERIOR TOP

The open top and bottom support diameter position and side refrigerant partitions allows full cold wrap with ICE-BRIX® Saddle Bag refrigerants.

Ideal for 6" – 8" round containers either cans or bottles. Round containers of temperature sensitive products stay in position while draped with a curtain of saddle bag ICE-BRIX® refrigerant or frozen dry ice.

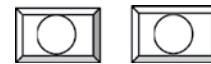

- Mix and select your height – 3 sizes creates 6 containers
- Versatile and saves money for customer mail orders
- Use with dry ice or refrigerant packs

- Reusable
- Recyclable

- Ultimate in temperature uniform stability
- Refrigerant Saddle Bags control the entire stability process
- Maximum temperature sensitive protection for bulk transport of refrigerated or frozen products even under extreme ambient conditions for up to 6 days

PART #	ICE-BRIX® SADDLE BAG PALLET REFRIGERANTS
SB10	8" x 34" 8 packs per length, in container cold wrap

NESTABLE INSULATED CONTAINERS

THERMAL ASSURANCE

Thermo Chill® Nestable Shippers are engineered especially for stackability, excellent drop shock and improved internal product cooling. Ideal for 1- 6 day transit time. They are lightweight, very durable and cost effective.

The nestable design saves space, doubles the quantity per truck in the same allotted warehouse space. It's a terrific benefit to your bottom line and storage concerns.

For extended shipping time, use convenient ICE-BRIX® new long size refrigerants or standard sizes to surround the product and across the top to maximize shipping time.

Delicate enough for tropical fish, live coral and strong enough for heavy 5 gallon plastic buckets of foods and liquids.

- Economical
- Light weight
- Space savers, storage and shipping
- Space reserved for refrigerants
- Unique design to extend Cold/Frozen ship time

INSULATED TOTES/SPACE SAVER KITS™

THERMO CHILL® REUSABLE PLASTIC INSULATED TOTES

These durable, ultra high impact, polyethylene totes are built to last and are insulated with thick polystyrene foam insert.

- Durable
- Stackable
- Lightweight
- Reusable

Reusable plastic totes with EPS foam liner are ideal for distribution, and storage.

- Plastic tote or plastic tote with EPS foam insulated liners
- Textured bottom ensures non-slip grip in transit
- Handle grips on either side for easy carrying
- Tamper proof lid, designed for use with cable ties (see page 60)
- High density polyethylene
- Replaceable EPS foam insulated liners
- Available in Gray, Red or Blue

INSULATED BOX LINERS

THERM-O-CHILL™ COOL STUFF™ offers a variety of eco-friendly, certified biodegradable, thermal protective package liners and mailers. Insulated padding is a purified, recycled textile fiber, processed with super-absorbent fiber with an EPA-accepted antimicrobial additive for condensate and spill containment. Durable biodegradable film is used to enclose insulated padding. COOL STUFF™ thermal box liners and mailer safely protects temperature sensitive products, and simple to use.

Certified biodegradable as per ASTM 5511; ASTM 5D209-91; ASTM D5338.98

- User-friendly
- Superior-Insulating Protective Padding
- ASTM Certified Bio-Degradable

COOL STUFF™ BOX LINERS CAN BE CUSTOMIZED TO FIT ANY BOX OR CARTON SIZE.

Quickly convert any stock box into an effective biodegradable earth friendly thermal insulated shipper.

- Provides up to 4 days protection.
- Available in two thicknesses.
- Space saving Cool Stuff™ liners store flat.
- Biodegradable earth friendly materials.
- Use with ICE-BRIX® cold packs for up to 4 days shipping.

DIAGNOSTIC TUBE MAILERS

DIAGNOSTIC SPECIMEN TUBE MAILING/SHIPPING SYSTEM

722KIT

Diagnostic specimen mailing system comes with or without tubes, combination triple outer packaging, kits have been tested and certified to meet the material construction and test performance requirements for the transport of diagnostic specimens. Complies with IATA packing instruction 650, U.S. Postal Service and DOT.

- Complete kits includes approved 10-ml specimen tubes, leakproof EPS foam mailer (base and lid), absorbent material, waterproof tape, leak tight zipper lock poly bag, corrugated shipping carton and instruction sheets.
- Two stock models; 3 tube and 8 tube protective mailer/shippers isolates and secures furnished (95 kPa) certified specimen tube.
- Accessory kits include leak-proof EPS foam mailer (base and lid), absorbent material, waterproof tape, leak tight zipper lock poly bag, corrugated shipping carton and instruction sheets. No receptacle specimen tubes included.
- Sufficient absorbent material for complete absorption of liquid contents in the primary receptacle tubes when filled with blood.
- Complete kits available in large count case or a convenient small case count. See chart for details.
- Foam tube mailers/shippers and packaging accessory components are available for customer/distributors, furnishing certified primary receptacle tubes.

SPECIALIZED LAB MAILERS

- Maximum breakage protection packaging for non-hazardous laboratory specimens. Ideal for biological, research, environmental, and public health laboratories.
- Accommodates specialize lab containers and many collection bottles, vials, petri dishes and cans
- Glue dots®, keeps lab sample containers in position
- Reusable and recyclable

LAB MAILER INSERTS AND MAILERS

CUSHION AND CUSTOMIZE YOUR PRODUCT TO MEET YOUR LABORATORY NEEDS.

211C - Bio-specimen mailer/shipper – Safely packs over 40 specimen tubes, petri dishes, vials or ampules and assorted swabs, with space for ICE-BRIX® refrigerant. 1 in" thick walls, assuring long temperature retention. Comes in an assembled 200# test corrugated box. ICE-BRIX® controls the interior temperature during transit.

201F - Compact Mailer – Foam container ships frozen or dry iced products comfortably for several days. Features include a chest style base with lid. Packs small bottles, vials and tubes. Small products are easy to pack and unpack safely. 1" thick foam walls shipper/mailler. Product 201C is the compact foam mailer unit in an assembled 200# test corrugated box.

290 KD - White Mailer Sleeve – Fits 201F.

207 WIC - 40ml Vial shipper – 1½" protective EPS foam insulated shipper – Secures up to 12 with a 28mm diameter. Includes re-useable polyethylene insert and one 24oz. ICE-BRIX® refrigerant pack to maintain sample temperatures. Vial shipper comes assembled in a 200# corrugated box.

201 VIC - Temperature Controlled (4) four tube mailer – One (1) inch protective foam insulated shipper includes a polyethylene (4) four cavity specimen tube insert. Holds (3-10ml) tubes, cavity size 105mm x 17mm. One each 8 oz. ICE-BRIX® refrigerant pack to control and stabilize specimen temperatures. Unit also includes an absorbent pad with a 2 mil thick polyethylene bag and twist tie closure. 200# test corrugated box included.

201 IE - Tube / Vial insert pad

201 GPP - General purpose convoluted foam pad

201 ETP - Eye Tissue insert pad

207 IE - 40ml (12 cavity) insert pad

[Inquire about other custom insert pads...](#)

STURDY FIBERBOARD AND CORRUGATED MAILERS

Sturdy white paperboard mailer boxes enhance the protective effectiveness of the foam tube mailers. All paperboard mailers are plain. Available upon request, custom print with lab name, address, postal permit number and any other handling message.

SAFETY™ SERIES BOTTLE SHIPPERS

- Economical EPS foam shippers for non-hazardous liquids
- Maximum protection from breakage, excellent shock absorbency, holds bottles secure during shipping
- Two piece molded construction with interlock seams, fit top and bottom sections for a tight seal and tape together in the pre-formed tape grooves.
- Laboratory tested and accepted for use by UPS and common carriers
- Full selection accommodates most all styles of bottles
- Reusable and recyclable

CAN SHIPPERS (HAZARDOUS LIQUIDS)

HAZARDOUS MATERIALS PAINT CAN FOAM SHIPPER KITS

EVERYTHING YOU NEED IN A CONVENIENT KIT!

- UN/USA D.O.T. APPROVED CONTAINERS
- Accepted and recommended by major freight carriers
- Includes: pre-assembled carton, paint can with lid, foam inserts and a locking ring

In accordance with CFR 49 178.601B shipper is responsible for choosing the correct packaging for product and for final closure. CONSULT APPROPRIATE REGULATIONS.

Poly bags, twist ties or absorbents are also available. These are not required for UN compliance.

CATEGORY A INFECTIOUS SUBSTANCES

CATEGORY A INFECTIOUS SUBSTANCES

Packaging for Category A infectious substances must be certified by an independent laboratory as meeting the applicable triple packaging regulations of IATA (for air shipments) and DOT (for domestic ground shipments). In general, the required triple packaging includes: leak-proof 95 kPa primary receptacle(s); leak-proof 95 kPa (14psi) secondary packaging; absorbent material of sufficient quantity to absorb the entire contents of the primary receptacle(s); an itemized list of contents; and a properly labeled shipping carton.

Polar Tech offers a broad array of certified packaging Models for use in transporting Category A infectious substances. The Models shown on this page will accommodate a wide range of primary receptacles. Select the Model (under Ambient, Cool or Frozen) that meets your requirements.

NOTE: The Models shown on this page are the most popular. If one of these Models does not meet your criteria, contact us for information about other available Models.

MEDICAL TRANSPORT BAG

CATEGORY B BIOLOGICAL SUBSTANCES

PART # BA06 CATEGORY B BIOLOGICAL SUBSTANCES – AMBIENT

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or
4 or 8 jars (jar dimensions of 2" diameter x 3" height).

CATEGORY B BIOLOGICAL SUBSTANCES

Packaging for substances in this Category must meet the triple packaging regulations of IATA (for air shipments) and DOT (for domestic ground shipments). In general, the required triple packaging includes: leak-proof primary receptacle(s); leak-proof 95 kPa (14psi) secondary packaging; absorbent material of sufficient quantity to absorb the entire contents of the primary receptacle(s); and a properly labeled outer shipping carton.

Polar Tech offers a broad diversity of complete packaging systems (Models) all of which meet the most stringent regulatory requirements for shipping Category B biological substances. Each Model will protect your specimen from damage during shipment and will maintain the required temperature for any specimen which is temperature sensitive.

Select the Model (under Ambient, Cool or Frozen) that meets your size and temperature requirements.

NOTE: The Models shown on this page are the most popular. If one of these Models does not meet your criteria, contact us for information about other available Models.

PART # BC06 CATEGORY B BIOLOGICAL SUBSTANCES – COLD

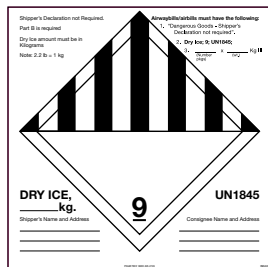

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or
4 or 8 jars (jar dimensions of 2" diameter x 3" height).

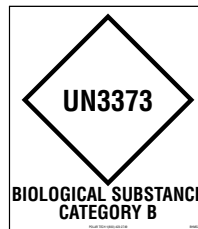

PART # BF12 CATEGORY B BIOLOGICAL SUBSTANCES – FROZEN

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or
4 or 8 jars (jar dimensions of 2" diameter x 3" height).

EXEMPT HUMAN SPECIMEN

EXEMPT HUMAN SPECIMEN

If there is a minimal likelihood that active pathogens are present in a specimen, that specimen can be shipped as an Exempt Human Specimen and the regulations applicable to infectious substance shipments are not applicable. Examples of routine tests that are considered exempt are: blood or urine tests for drugs, alcohol, cholesterol levels, glucose levels, hormone levels and/or prostate specific antigens; tests to monitor organ functions; therapeutic drug monitoring tests; pregnancy tests; and biopsies for cancer.

Polar Tech offers many Exempt Human shipping Models all of which will protect your specimen from damage during shipment and will maintain the required temperature for any specimen that is temperature sensitive.

Select the Model (under Ambient, Cool or Frozen) that meets your size and temperature requirements.

NOTE: The Models shown on this page are the most popular. If one of these Models does not meet your criteria, contact us for information about other available Models.

PART # EHF12 EXEMPT HUMAN SPECIMEN - FROZEN

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or
4 or 8 jars (jar dimensions of 2" diameter x 3" height).

PART # EHC12 EXEMPT HUMAN SPECIMEN - COLD

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or
4 or 8 jars (jar dimensions of 2" diameter x 3" height).

PART # EHA06 EXEMPT HUMAN SPECIMEN - AMBIENT

The Model shown is sized to accommodate up to:
6 or 12 15ml vials (16mm x 125mm maximum size);
3 or 6 standard petri dishes (3.5" x 5/8");
15 or 30 swabs (7" maximum length); or

ECONOMICAL PALLET COVERS

INSULATED PALLET COVER (PCEB) – LIGHT DUTY

Cover pallet of perishables for short term freight shipments with reflective thermal protection. Extend shipping to medium term with ICE-BRIX® saddle bag or Cold Pocket cold pack system, with a curtain of cold™ to uniformly extent perishable products for additional 24 hours or more. Secure with tape or stretch film.

- Effective reflective barrier
- 3/16" metalized bubble
- Reuseable

ECONOMICAL PALLET COVER (PCEL) – LIGHT MEDIUM DUTY

Provides short term thermal protection for pallets of perishables. Light medium duty pallet covers are constructed from metalized film laminated to polyethylene foam. Features a large document pocket and easily covers top and sides of pallet. Secure with clear tape or stretch film.

For an additional 24 hour shipping use ICE-BRIX® saddle bag cold wrap or Cold Pocket™ system to apply a curtain of cold™ to the pallet of perishables.

- Reflective Insulation
- Moisture barrier
- Document pocket
- Cost effective
- Reusable

LABELS D.O.T. AND INTERNATIONAL

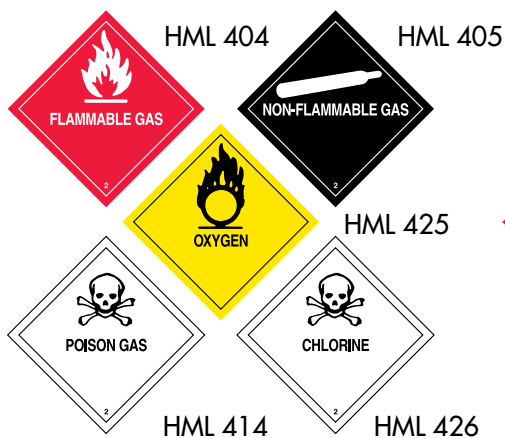

HAZARD LABELS

Our international labels comply with IATA and UN recommendations for the transport of dangerous goods. All are pressure sensitive, 100mm x 1mm (4 x 4). Labels shown are paper with permanent pressure sensitive adhesive. All are available in rolls of 500. This is only a partial list of labels, please request a full catalog.

HAZARD CLASS 1 EXPLOSIVES

HAZARD CLASS 2 GASSES

HAZARD CLASS 3 FLAMMABLE LIQUIDS

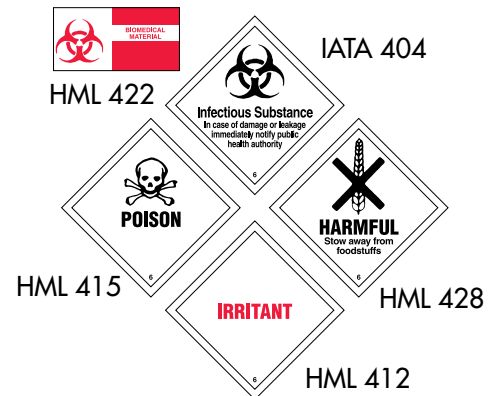

HAZARD CLASS 4 FLAMMABLE SOLIDS

HAZARD CLASS 5 OXIDIZER & ORGANIC PEROXIDE

HAZARD CLASS 6 POISONOUS & ETIOLOGICAL

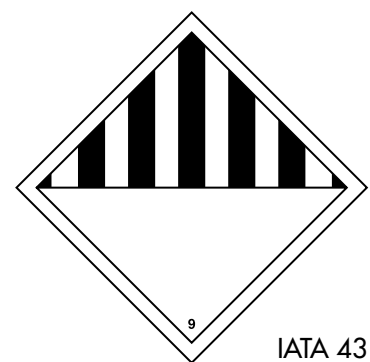

HAZARD CLASS 7 RADIOACTIVE

HAZARD CLASS 8 CORROSIVE

HAZARD CLASS 9 MISCELLANEOUS DANGEROUS GOODS

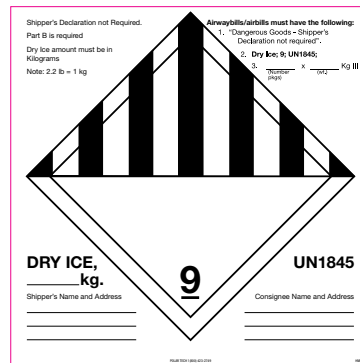

DRY ICE & BIOHAZARDOUS LABELS

MISCELLANEOUS DANGEROUS GOODS DRY ICE LABELS

This label complies with Federal Express labeling and marking recommendations for shipments containing dry ice. 5 1/2 x 5 1/2 inch gloss paper, pressure sensitive label, 500 per roll. Personalized label with name & address of shipper or consignee available upon request.

PART # HML628

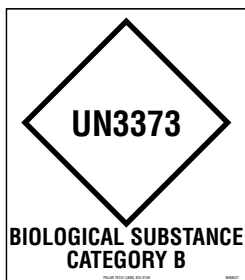

BIOHAZARDOUS AND SUBSTANCE CATEGORY B LABELS

Depending on the type of packaging selected to transport Biological Specimens, there are mandatory markings that must appear on the outer packaging according to DOT and IATA regulations. Please refer to IATA Packing Instruction 650 for more details.

GENERAL REQUIREMENTS

Diagnostic specimens must be packed in good quality packaging, which must be strong enough to withstand the shocks and loadings normally encountered during transport, including trans-shipment between transport units and between transport units and warehouses as well as any removal from a pallet or overpack for subsequent manual or mechanical handling. Packaging must be constructed and closed so as to prevent any loss of contents when prepared for transport which might be caused under normal conditions of transport, by vibration or by changes in temperature, humidity or pressure.

Primary receptacles must be packed in secondary packaging in such a way that, under normal conditions of transport, they cannot break, be punctured or leak their contents into the secondary packaging. Secondary packaging must be secured in outer packaging with suitable cushioning material. Any leakage of the contents must not substantially impair the protective properties of the cushioning material or of the outer packaging.

BHM527 – 3 1/2 x 4

BHM310 – 2 1/2 x 2

BHM314 – 3 x 2

BHM311 – 3 1/2 x 1

BHM312 – 3 1/2 x 1

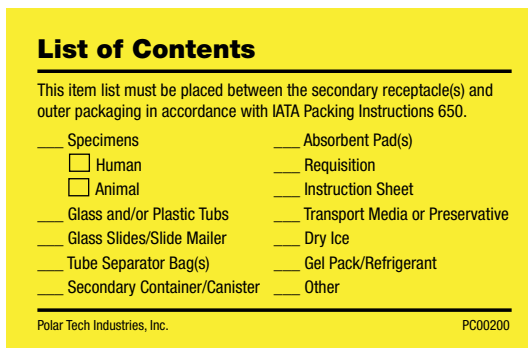

BHM313 – 2 x 7/8

LIST OF CONTENTS CARD

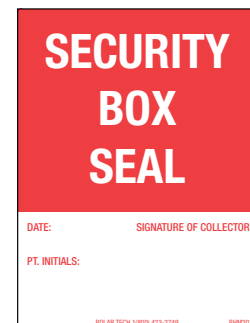

IATA Packing Instruction 650 requires "an itemized list of contents" card as part of the packaging instruction. This card should be placed between the secondary packaging and the outer packaging.

Polar Tech's standardized list of contents card is available in any printed quantity requested. If you require a custom card for your particular components, please contact Polar Tech for a quotation.

Stock card size is 4.25" x 2.75" 100 per pack

PC00200 – 4 1/4 x 2 3/4

BHM201 – 1 7/8 x 2 1/2

COLD AND WARM/TEMP INDICATORS

COLDMARK² TEMPERATURE INDICATORS

ColdMark² Temperature Indicators are the ideal way of assuring your products have not been exposed to cold temperatures below 36°F / 2°C. Guaranteed to work within + or - 1°C degree of its response temperature. You know at a glance if your product has been exposed to freezing temperatures in transit (shipping) or storage. The highest degree of accuracy in the industry, providing a permanent record that assures your product's integrity and quality. Our courteous customer service professionals will answer any questions you might have on our quality line of temperature indicator recorder products.

- Assure the quality of refrigerated pharmaceuticals, chemicals, film, medical devices and electronics
- Provides an accurate visual record of damaging low temperature conditions
- Record conditions at a critical temperature
- Easy to use

PART #	DESCENDING	QUANTITY
520	2° C / 36° F	100 ColdMark ²

Inactivated & unarmed

Armed & exposed past threshold

- 1 Push "power" button to activate
- 2 Individually serialized
- 3 Indicates the device is armed
- 4 Turns RED when exposed past threshold
- 5 Temp sensitivity
- 6 Part No.

BOT

BOM

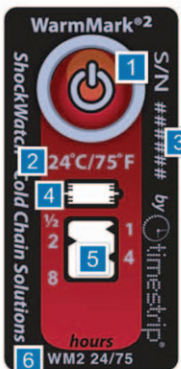

- Run-out window is calibrated to isothermal temperature of 2°C above the stated printed threshold temperature**
- Blister on Top (BOT) – armed on the front of device. Allows smaller increments of time/temp exposure to be shown.
- Blister on Back (BOB) – armed on the back of device. Allows for longer run-out times

** based on 2°C, exact temp does effect run-out

WARMMARK² TEMPERATURE TAGS

WarmMark² time temperature tags leave you in control even after your product has been shipped. Your customers know at a glance if the product has been exposed to abusive temperatures during shipping or storage. The Warm Mark² tag accurately (+ or - 1°C) indicates if your product has been exposed to heat above a selected temperature. Please contact our customer service representative for more details.

PART #	ASCENDING TEMP. WARNING EXPOSURE	BOT VS. BOB	QTY PER CASE
501	-20° C / -4° F	BOT	100
508	-14° C / 7° F	BOT	100

ADHESIVE GLUE DOTS AND DISPENSER

PRO2-80 HIGH TEMPERATURE (INDUSTRIAL GLUE GUN)

- Ergonomic comfort grip and long trigger
- Protective heat resistant nozzle cover
- Uses standard glue sticks.
- Operating temperature: 380° F
- Detachable wire stand.
- Delivers 2.5 pounds of glue per hour

PART #	GLUE STICK DIAMETER	GLUE STICK LENGTH	WATTS	VOLTS
1052	7/16" Regular	10" and 15"	80	120

HE-750 HIGH TEMPERATURE (PROFESSIONAL GLUE GUN)

- Ergonomic comfort grip and long trigger
- Uses standard glue sticks.
- Operating temperature: 380° F
- Complete with removal wire stand.
- Ideal choice for light duty industrial and packaging applications.

PART #	GLUE STICK DIAMETER	GLUE STICK LENGTH	WATTS	VOLTS
1150	7/16" Regular	10"	80	120

PRO8000A QUICK HEATING (INDUSTRIAL GLUE GUN)

- Ergonomic design long trigger for less effort.
- Lighted on and off switch.
- Integrated gun balancer mount hole.
- Heat resistant nozzle cover.
- Dual heaters and 180 watts of heating power that features a 2 minute quick heat up time.
- Stroke adjustment screw allows equal amounts of glue per squeeze.

1053	7/16" Regular	10" and 15"	80	120

PRO2-220 ADJUSTABLE TEMPERATURE (INDUSTRIAL GLUE GUN)

- Ergonomic finger trigger design for less effort
- Temperature adjustment from 248° F to 428° F
- Integrated gun balancer mount hole
- Lighter On/Off switch
- Stroke adjustment screw – equal amounts of glue
- Includes: extra nozzle, wire stand and stroke adjustment screw.

PART #	GLUE STICK DIAMETER	GLUE STICK LENGTH	WATTS	VOLTS
1151	7/16" Regular	10" and 15"	80	120

ADHESIVE SPRAY AND GLUE

SPRAY ADHESIVE PART # 1154

Industrial grade multi-purpose use to bond paper, cardboard, glass, metal, plastic, wood, fabric, floral foam and cork. Permanent or repositionable. Net Weight: 10 oz.

GLUE PART # 1155

Extra thick glue for superior bonding and flexibility. Bonds to metal, plastic, wood, glass, ceramics, fabric, vinyl. 2.0 fl. oz. tube.

GLUE DABS

Pre-made pressure sensitive dabs of adhesive - no need to heat up the glue gun. For temporary or permanent assembly applications. 6,000 dabs per box. Each dab is approximately 3/8" in diameter. Available in 4 formulas.

PART #	FORMULA	DESCRIPTION
1145	Low Tack	Temporary bonding; easily removes from surface
1146	Medium Tack	Temporary bonding; removable
1147	High Tack	High strength; still removable from most surfaces
1148	Super High Tack	Permanent bonding to most surfaces

PERSONAL MINI GLUE GUN KIT

- Includes: dual temperature mini glue gun and 12 - mini (.27") 4" all-temperature glue sticks

PART # 1152

MINI GLUE GUN GLUE STICKS

- All-Temperature Clear 5/16" Diameter
- All Purpose 4" Glue Stick 100 Sticks Per Bag

PART # 1153

GLUE STICKS, APPLICATORS, KNIVES & BLADES

GLUE STICKS

601 Low-Melt Glue Sticks

- Fast set time with excellent hot tack
- Low temperature adhesive for sealing corrugated cartons, wood, coated paper and ideal for gluing foam.
- Bonds to most porous materials.

701 Fast Set Glue Sticks

- Quick 15 second bonding range
- Hot melt adhesive for packaging and sealing corrugated cartons for medium to larger cartons.
- Bonds to most porous materials such as wood, paper and cloth.

725 All-Purpose/All Temperature Glue Sticks

- Works in either low temperature (250°F) or high temperature (380°F)
- Bonds to porous and non porous, ribbon, floral foam, paper, silk flowers and wood
- 60 second bonding range

925 Acrylic Hot-Melt Glue Sticks

- Unique high performance adhesive for superior bonding to hard and bond surfaces
- Bonds to concrete, vinyl, metal, rubber, tile, stone, ceramic, leather, melamine, coated papers, foil, wood, nylon, fabric, glass plastics and more
- Bonds in cold and frozen applications
- 60-80 second bonding range

PART #	TYPE	GLUE STICK SIZE	COLORS	QTY PER CASE

UTILITY KNIVES AND BLADES

MODEL 1313 CUTTER

All Metal Heavy Duty Safety Spring-Back Blade Utility Knife. Blade notch allows for the cutting of stretch wrap or twine without extending the blade. Uses 1319 Blade.

MODEL 1314 CUTTER

All Metal Rugged Fully Retractable All Purpose Utility Knife. Multiple blade length settings. Perfect for industrial, maintenance, shipping rooms, construction and anywhere a durable cutter is needed. Uses 1319 Blade.

MODEL 1315 CUTTER

Industrial Heavy Duty Retractable Snap Off Blade Box Cutter. Ideal for most industrial, maintenance and shipping room applications. Uses Style 1320 Blade.

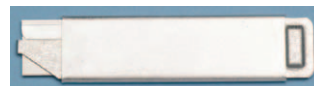

MODEL 1316 CUTTER

Ultra Rugged Industrial Retractable Snap Off Blade Box Cutter. Protective and comfortable thick plastic jacket. Constructed for the toughest heavy duty cutting applications. Uses Style 1320 Blade.

MODEL 1317 CUTTER

All Metal Tap Knife. A lightweight compact all steel slide cutter. The inexpensive blade can be reversed or changed in seconds. Uses Style 1318 Blade.

PAPER GUM TAPE AND MACHINES, COLD TEMP TAPE

INTERTAPE REINFORCED PAPER GUM TAPE

Fiberglass reinforced tape is known for its excellent performance in high speed, overfill and underfill applications.

- Consistent adhesive, coating and lamination
- Paper moisturized reduces curl, increases tape stretch & makes tape more flexible
- Larger 1½" diameter cores assure a tighter wind and full roll utilization (no curl)
- Dispenses on all water activated paper gum tape machines

IPG - ECONOMY GRADE (FOR SEALING 20 LB BOXES)

TAPE DISPENSERS AND MANUAL LABEL DISPENSERS

TAPE DISPENSERS

PART # 1321 — PREMIUM MOST POPULAR

Natural rubber roller, hardened all steel heavy gauge blade, heavy duty frame, for durability, available with an adjustable tension brake and our patented safety shield.

PART # 1322 — ECONOMY

Provides an easy economical way to dispense 2 inch wide carton sealing tape. Made from hi-impact plastic and a hardened blade and is perfect for on the spot application of tape.

PART # 1323 — HAND ECONOMY

Versatile solid steel frame tape gun with adjustable brake. Lightweight, more rugged and will last longer than other dispensers and is designed for tapes up to 2 inch wide.

PART # 1324 — HEAVY-DUTY

Professional heavy duty all steel frame tape gun for tape up to 3 inch wide. Designed for high productivity applications, has a hardened blade, natural rubber roller and molded finger grip.

PART #	DESCRIPTION	TAPE SIZE

1322	Economy	2"
1323	Hand Economy	2"
1324	Heavy-Duty	2"
1325	Heavy-Duty (not shown)	3"

SH-400

Ultra-economical pressure sensitive label dispenser is perfect for labels up to 6 inch wide. Easy to adjust and requiring no tools, the specially designed extra sensitive micro-switch senses the edge of the label as it is fed and stops the motor exactly at the same point each cycle. Works on all types, styles and shapes of die-cut and butt-cut labels on a 1" or 3" core.

- Speed: 240 inches per minute
- Power: 110 Volt

PART #	L x W x H	MINIMUM LABEL SIZE W x L	MAXIMUM LABEL SIZE W x L	WEIGHT
1342	12" x 10½" x 10"	¾" x ¾"	6" x 9"	12 lbs.

SH-404TR

Premium label dispenser, peels, releases and advances all types of butt-cut and die-cut labels either opaque or transparent on rolls or fan-folded. When an operator removes one label the next one is automatically dispensed. Designed using optical-reader reliability, can feed all labels whether they are large or small, opaque or transparent, irregular shaped or round. Large roll capacity, high speed motor, heavy duty construction and automatic liner re-winder are all features of this machine.

- Speed: 240 inches per minute
- Power: 110 Volt

SHRINK WRAP EQUIPMENT

SUPER-SEALER® SYSTEMS

- Heavy-duty steel construction features a built-in adjustable timer with LED light. UL listed.
- Super-Sealer System includes: Bag sealer, #SWSVAR Heat Gun, 200' of 75 gauge PVC film and 1 service kit.
- Super-Sealer Service Kit includes: Sealing pad, (5) 3 Mil Teflon® tape strips, (3) 10 Mil Teflon® tape strips, wire, micro switch, arm spring and fuse.

SYSTEM PART #	SERVICE KIT PART #	SEAL WIDTH
1407	1420	13"
1408	1421	18"

HEAT GUNS

- Use for a variety of applications including heating shrink film and removing paint or varnish. UL listed.

PART #	DESCRIPTION	HIGH TEMPERATURE	LOW TEMPERATURE
1409	Variable Temperature	1,100°F	250°F

Exfilmplus® SHRINK FILM

EXCELLENT PERFORMANCE ON ALL TYPES OF MANUAL, SEMI-AUTO AND AUTOMATIC EQUIPMENT

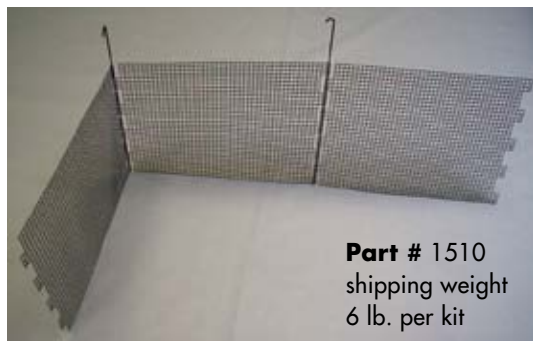

- Multi-layer, biaxially oriented shrink film requires no dwell time.
- High gloss appearance and excellent clarity.
- Puncture resistant, centerfold shrink film.
- Works well on irregularly shaped items.
- Meets FDA requirements for direct food contact.
- Great for cold temperature shortage applications.
- Approved for mailings by the U.S. Postal Service.

GARDEN FENCE, PLANT PROTECTION AND FAUCET COVER

Part # 1510
shipping weight
6 lb. per kit

MODULAR PLANT AND GARDEN FENCE SYSTEM

Protect your office and commercial building flowers and plants.

- Keep critters and animals from harming flowers and plants
- Reusable year after year
- Easy to use
- Expandable with multiple kits

Garden Kit contains: six 17½" x 24" high, ½" square green wire mesh panels and six connector stake rods.

EZ-Grow box with modular fencing protects plants from wind and critters. Ideal for: balcony's, patios, home and business, indoors and out.

Join us at polargrowbox.com for helpful exchange of growing and recycling, pictures, stories, facts and fun.

EPS FOAM PLANT PROTECTION SYSTEMS

PROTECT YOUR FLOWERS AND PLANTS FROM HARSH WINTERS

Polar Safe - Industrial strength EPS foam plant protection systems against

- Protection against freezing temperatures and animals and pesky critters
- Reusable

Durable for year after year use. Secure plant cone into ground using hold down anchors

PART #	DESCRIPTION	DIMENSIONS
1505	Standard - Freeze Temperature	12" x 12" x 14" high
1506	Medium - Sub Freeze Temperature	16" x 16" x 18" high
1507	Large - Extreme Freeze Temperature	18" x 18" x 20" high
1508	Extra Hold Down Anchors - 20/bundle	---

INSULATED FAUCET COVER

Protects outside faucet from freezing.

Polar Safe - Industrial large faucet insulated cover — Protects below sub-zero temperatures

- Quick and Easy to use
- Double wire tie secure
- Re-use year after year

Part # 1509 Large faucet cover

CUSTOM APPLICATIONS

We understand that your image is everything.

This is especially true in the final presentation of your product.

Knowing this enables us to work with you in selecting the shipping system that is not only functional but also enhances your product among its competitors.

We address this need with many customizing options within our varied stock product line.

For more detailed assistance, please contact our customer representatives at **1-800-423-2749**

FOAM CONTAINERS

Our EPS foam containers can be embossed on the lid with your logo as a permanent design.

Great for customer impression, recognition and re-use as a personal cooler with your memorable company logo visible.

REFRIGERANT PACKS

Add promotional impact and increased market exposure by using our ICE-BRIX® gel refrigerant packs.

Your logo or design can be imprinted on these bags in red, green, blue or black. Low minimum runs, small set-up charge required. 4 color process is available, call for details.

PANELS & INSERTS

When our stock sizes are not close enough to fit your product or you require special protection, we still have options available to you.

We inventory EPS foam and polystyrene foams that can be cut to any thickness to line a custom-sized box to meet your packaging requirements.

Custom Pads and/or Inserts can assist with specific product placements and protection.

CUSTOM CORRUGATED

Our Carry Packs and other corrugated products can all be printed to your specifications.

It's a safe and impressive way to transport your perishables. Taken home via train, airline, bus—portable advertising.

Ideal for any industry: Seafood, Steaks, Gourmet Chocolates, Pastries or Dairy Products

PERISHABLE PACKAGING ASSISTANCE

C°	50	40	30	20	10	0	-10	-20	-30	-40	-50	-60	-70
F°	120	100	90	80	70	60	50	40	30	20	10	0	-10

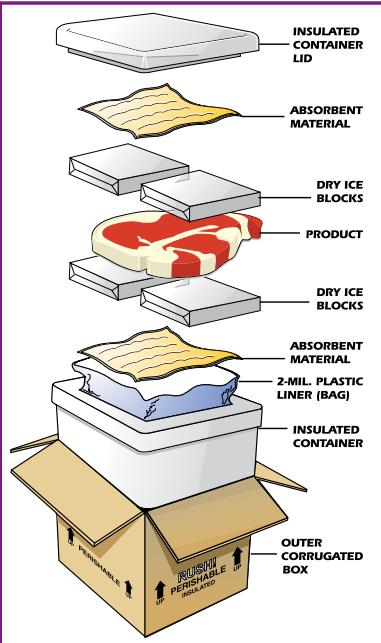

Perishable Packaging Assistance

Packaging should never be taken lightly. To have an impact, packaging must assert itself. Manufacturers often think of packaging as an expense but it is one of their most important investments. Perishable packaging carries enormous responsibilities. Our packaging designers will work with you to protect your product from both internal and external damage during transport, not to mention temperature protection. We have developed programs combined with our sophisticated

test labs to assist in determining the most effective packaging for each shipping situation. With continual testing of all containers and refrigerants, we suggest containers with the appropriate wall thickness, as well as type and amount of refrigerant required for your chosen mode of transportation. See back cover for all sizes, dimensions and part numbers. Always call with questions, for more Frequently Asked Questions, visit our web-site at www.polar-tech.com

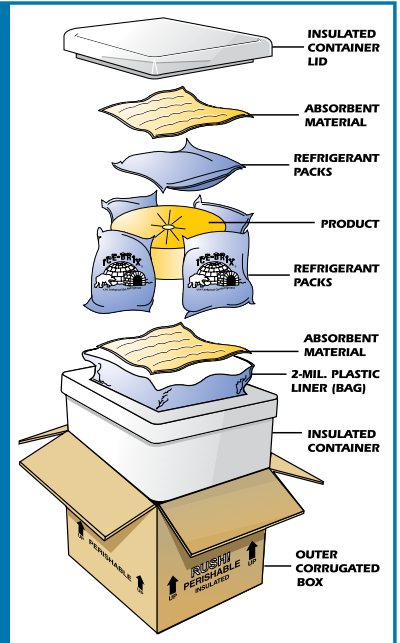

DRY ICE – FROZEN

A general guide for use with Block Dry Ice is: Dry Ice sublimates approximately 3 to 5 pounds per day. The larger the shipment or container, the more dry ice that is generally required. You should surround your product (top, bottom, & sides) for uniform freezing. Pellet, rice & crushed dry ice requires additional pounds per day, due to it's faster sublimation.

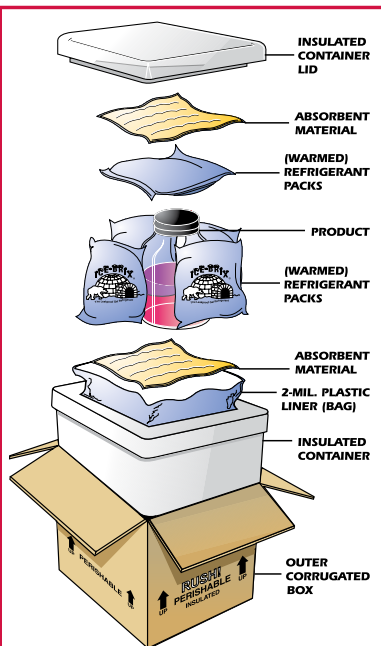

REFRIGERANT PACKS – CHILLED

The general guide for refrigerant packs is a min. of 1:5 to 1:3 pound ratio of refrigerant to product. Larger shipments or containers may require additional refrigerant packs. For best results, surround products for optimum performance during shipping. Special consideration for temperature and climate seasonal changes may require more or less refrigerant packs.

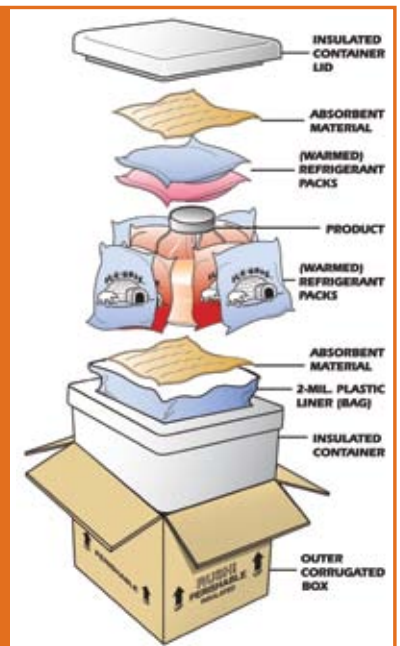

WARMING – HEAT SINK

Prevent your products from freezing by heating refrigerant packs in boiling water or on 'Low' heat microwave setting. This is called a "Heatsink", and can be used to ship products in the Winter that might freeze in shipment. For best results, surround your product on all sides with 68°F or higher warm packs for extended shipping times.

CONTROLLED TEMP. RANGE

The general guide for refrigerant packs cold/warm and frozen is a minimum of 1:3 lb ratio of refrigerant to product. Larger shipments or containers may require additional refrigerant packs. For best results, surround products with cold/warm refrigerants and frozen to the surrounding cold/warm packs, for controlled temperature performance. For best results we recommend testing to adjust amounts for the desired results.
