

MAXIMIZER™

YOUR NEW MOP. MAXIMIZED.

TRADITIONAL WET MOPPING has been and remains the preferred solution for cleaning large, hard floor surfaces. It is a time-consuming and physically demanding job that requires significant exertion with repetitive motions, taking a toll on cleaning professionals' bodies. In fact, the janitorial profession has 2X the industry average in worker's compensation claims due to overexertion.

WITH 30% MORE COVERAGE and 25% less weight, Maximizer reduces the time spent cleaning large areas, which means less strain on cleaning professionals and increased productivity. Whether you are a facility operator or professional user, the benefits of a more effective mopping solution add up.

30% MORE FLOOR COVERAGE

THE MAXIMIZER MOP'S UNIQUE DESIGN delivers the industry-leading mop spread, allowing it to provide 30% more floor coverage than the standard wet mop. By allowing your staff to clean floors faster, the Maximizer delivers improved productivity, providing your team with more time to focus on the additional tasks of the job.

MAXIMIZER

25% LESS WEIGHT

MEANS LESS EFFORT WHEN MOPPING AND LIFTING.

The Maximizer delivers the maximum floor coverage at an optimal weight. When wrung out the Maximizer mop weighs 25% less than the standard mop – which helps to alleviate exertion due to mopping's repetitive and physical requirements.

MAXIMIZER BLEND

Absorbs 3X as much as cotton

UNIVERSAL HEADBAND

Works with Industry Standard Mop Handles

*Percentage weight lost after 50 commercial launderings

CLEANING WITH COLOR

COLOR-CODED CLEANING is a growing trend in the cleaning category, including in mopping. The use of color coding allows for companies to easily distinguish and identify which products should be used in which areas of a facility, reducing cross-contamination.

Color-coding can also yield significant financial benefits. Leveraging the use of colors to distinguish between divisions or functional areas allows for clear resource allocation and budgeting.

RECOMMENDED USAGE:

Color-coding systems can vary by vertical and application; however, Rubbermaid Commercial Products, in alignment with industry experts, recommend the following system:

RED: High Risk Restroom Areas

BLUE: General Purpose Cleaning for Low Risk Areas

GREEN: General Food Processing, Serving and Bar Areas

YELLOW: Back of House Cleaning

Maximizer Blend Mops
