

9800 SYSTEM

DTM URETHANE MASTIC

Direct-To-Metal (DTM)

Direct-to-tight rust

Topcoat over epoxy primer

Ultimate corrosion protection

- For severe environments
- Self-priming with excellent adhesion
- Extremely durable, high gloss finish for long-lasting results
- Less prep and application time
- VOC compliant (<340 g/l)

9800 SYSTEM

DTM URETHANE MASTIC

High-solids, High-build, Two-component Acrylic Urethane

Less Prep Time • Applies direct-to-metal or direct-to-tight rust

Less Application Time • Self-priming, high film build, 1-coat hide

Less Downtime • Less surface preparation & fewer coats

Greater Lifetime Value • Ultimate protection for long-term performance and appearance

Typical applications

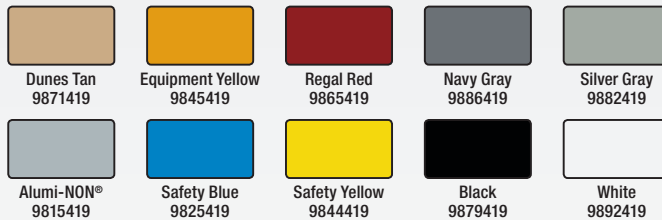

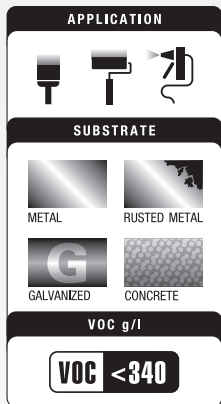

Tanks • Towers • Equipment
Metal Buildings • Structural Steel
and Other Rusted Surfaces •
Concrete Floors & Line Striping

Typical industries

Heavy Industrial Manufacturing • Chemical Processing
Pharmaceutical • Food & Beverage Processing
Crude Oil & Petroleum • Pulp & Paper • Power Plants

Colors (Base)

This is a two-component system. Order base and activator separately.

Tint Bases Available for Custom Colors:

Masstone: 9807470 • Deep: 9808405 • Light: 9809415
Red: 9805470 • Yellow: 9806470

Activator

Activator: 9801501

Primers

Red Primer: 9360402 • Buff Primer: 9370402

High Solids Red Primer: HS9369407 • High Solids Gray Primer: HS9381407

Note: Use of primer is required on severe exposures, aluminum, and on heavily rusted surfaces.*

Companion Product

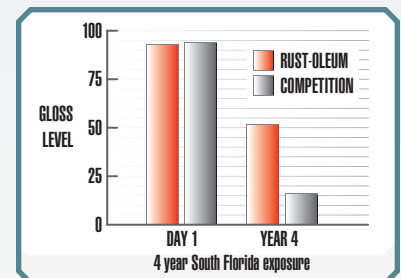

Urethane Accelerator: 202548

Chemical and coastal environments

Durable finish for aggressive environments

Ultimate color and gloss retention**

Custom colors available

*See Technical Data Sheet R0-71 (Form #2078990)
**See Urethane Advantage Sheet (Form #206853) for test results
