

Builder Board™

Contractor Grade Construction Board

Product Information Guide

Part Number: BLDLS38100

Product Description:

BLDLS38100 is a heavy duty paperboard designed to protect all types of flooring from tracked in dirt and mud, paint spills, dust, construction debris and damage that may occur throughout the construction process. Builder Board™ is non-staining and breathable allowing moisture to escape for the continued curing of new floors. Made from at least 33 percent post consumer material, this 100 percent recyclable protection lays fast and flat, is tough and reusable.

Uses:

Protects Granite, Travertine, Marble, Terrazzo, Stone, Colored Concrete, Tile, Wood, Carpet, Linoleum, etc. Excellent protection for floors, walls, counter tops, cabinets and more.

Properties/Characteristics

Median Results

| | |
|-----------|---|
| Roll Size | 38in. x 100ft. (317 sq.ft. of coverage) |
| Thickness | 45 mil (approx.) |
| Weight | 46 lbs. per roll (approx.) |
| Density | 3.26 to 3.31 |

Performance Features:

- Heavy-duty temporary floor protection
- Repels water, mud, paint and more
- Breathable, allows vapors to escape
- Tough enough to be driven on
- Optimal density for improved durability
- Can be seamed together for larger areas
- Cover the same area as 10 sheets of masonite
- Non-staining

Eco-Friendly Features:

- 100 percent recyclable
- Can be rolled back up and reused
- At least 33 percent post consumer material
- Contributes points to LEED Certified Projects

MSDS:

Upon review of relevant OSHA regulations and the characteristics of paperboard, a MSDS is not required for paperboard because paperboard falls within the exemptions for a “manufactured article” and “wood products”.

First, under OSHA regulations, a MSDS is not required for manufactured “articles” or manufactured items: (i) which are formed to a specific shape or design during manufacture; (ii) which has an end use function(s) dependent on whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts, of hazardous chemicals... and does not pose a hazard or health risk to employees. Paperboard is not subject to the MSDS requirements because all three conditions are met.

Second, paperboard is further exempt from the MSDS requirements as a “wood product”. Wood products are exempt because their primary hazard is flammability or combustibility, and because the hazard is unmistakable and obvious and does not require further communication. OSHA has stated that “products such as lumber, plywood, and paper are easily recognized in the workplace and pose a risk of fire that is obvious and well-known to the employees working with them”. Paperboard shares the relevant characteristics of these products.

The physical properties listed above are average values and are not to be construed as specifications. Our suggestions and recommendations for use are based on tests we believe to be reliable. However, the purchaser must determine the suitability of the product for their intended use. Surface Shields, Inc. assumes no liability for claims beyond the replacement value of our product proved to be defective.
