

ULTRA- DRAIN SEALS[®]

STOP SPILLS FROM GOING DOWN THE DRAIN

- Reinforcing mesh is “sandwiched” between layers of polyurethane — increases durability and resistance to tearing.
- Unique, urethane construction allows the pad to deform and seal off most drains — temporarily “seals” to any smooth surface.
- A valuable addition to any emergency response plan, spill kit, SPCC, or stormwater management program.
- Unlike some alternative products, BOTH sides will quickly seal drains — there is no specified “top” or “bottom.”

Reinforcing mesh resists tearing.

Optional Ultra-Drain Seal Wall Mount Units allow quick response to any spill — just “grab and go”!

**Protection from "long-term exposure" is limited to the damaging effects of UV radiation. The Ultra-Drain Seal Plus is not designed for repeated, long-term exposure to vehicular traffic. The reinforced PVC top layer allows the product to be driven over on occasion, but because of the softer nature of the bottom sealing layer, it is not recommended that the product be driven over repeatedly.*
